Artificial Intelligence in Biomedical and Modern Healthcare Informatics M. A. Ansari, R.S Anand, Pragati Tripathi, Rajat Mehrotra, Md Belal Bin Heyat, 2024-10-03 Artificial Intelligence in Biomedical and Modern Healthcare Informatics provides a deeper understanding of the current trends in AI and machine learning within healthcare diagnosis its practical approach in healthcare and gives insight into different wearable sensors and its device module to help doctors and their patients in enhanced healthcare system The primary goal of this book is to detect difficulties and their solutions to medical practitioners for the early detection and prediction of any disease The 56 chapters in the volume provide beginners and experts in the medical science field with general pictures and detailed descriptions of imaging and signal processing principles and clinical applications With forefront applications and up to date analytical methods this book captures the interests of colleagues in the medical imaging research field and is a valuable resource for healthcare professionals who wish to understand the principles and applications of signal and image processing and its related technologies in healthcare Discusses fundamental and advanced approaches as well as optimization techniques used in AI for healthcare systems Includes chapters on various established imaging methods as well as emerging methods for skin cancer brain tumor epileptic seizures and kidney diseases Adopts a bottom up approach and proposes recent trends in simple manner with the help of real world examples Synthesizes the existing international evidence and expert opinions on implementing decommissioning in healthcare Promotes research in the field of health and hospital management in order to improve the efficiency of healthcare delivery systems *T-Minus AI* Michael Kanaan, 2020-08-25 Late in 2017 the global significance of the conversation about artificial intelligence AI changed forever China put the world on alert when it released a plan to dominate all aspects of AI across the planet Only weeks later Vladimir Putin raised a Russian red flag in response by declaring AI the future for all humankind and proclaiming that Whoever becomes the leader in this sphere will become the ruler of the world The race was on Consistent with their unique national agendas countries throughout the world began plotting their paths and hurrying their pace Now not long after the race has become a sprint Despite everything at stake to most of us AI remains shrouded by a cloud of mystery and misunderstanding Hidden behind complicated and technical jargon and confused by fantastical depictions of science fiction the modern realities of AI and its profound implications are hard to decipher but crucial to recognize In *T Minus AI* Humanity's Countdown to Artificial Intelligence and the New Pursuit of Global Power author Michael Kanaan explains AI from a human oriented perspective we can all finally understand A recognized national expert and the U S Air Force's first Chairperson for Artificial Intelligence Kanaan weaves a compelling new view on our history of innovation and technology to masterfully explain what each of us should know about modern computing AI and machine learning Kanaan also dives into the global implications of AI by illuminating the cultural and national vulnerabilities already exposed and the pressing issues now squarely on the table AI has already become China's all purpose tool to impose its authoritarian influence around the world

Russia playing catch up is weaponizing AI through its military systems and now infamous aggressive efforts to disrupt democracy by whatever disinformation means possible America and like minded nations are awakening to these new realities and the paths they re electing to follow echo loudly the political foundations and in most cases the moral imperatives upon which they were formed As we march toward a future far different than ever imagined T Minus AI is fascinating and crucially well timed It leaves the fiction behind paints the alarming implications of AI for what they actually are and calls for unified action to protect fundamental human rights and dignities for all
