Advancement in Equine Pain Management Ludovica Chiavaccini, Rachel Anne Reed , Claudia Spadavecchia, 2025-02-17 Despite recent improvements in the perception of equine pain and welfare the recognition and treatment of pain in horses still lag behind their small animal counterpart While most clinicians strongly advocate preventing and alleviating pain it is

still debated whether a little discomfort may reduce the risk that the animal will overuse an injured body part especially in prey animals like horses In addition the reluctance to use systemic full mu opioid receptor agonists still exists due to the concern that opioids may cause excitation the fear that opioid receptor agonists may decrease gastrointestinal motility and the conflicting data on the analgesic efficacy of full mu opioids in horses with naturally occurring diseases Therefore this special issue will revolve around recent advancements in equine pain understanding recognition and management Authors are encouraged to submit papers in the areas of recognizing preventing modulating and managing acute and chronic pain in horses We also encourage submissions focusing on pain mechanisms such as mechanistic studies ex vivo or preliminary work involving tissues or biological samples from well phenotyped horses Finally we note significant advancements in the development of therapeutic platforms viral transfection modalities or targeted neurotoxins that have been documented on other species and suggest relevance to the equine patient
