Cyber Monday Today Store Hours:

Urban and Regional Planning and Development Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M.

Pomeroy, 2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national, and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development, and the role of governance has been transformed. Centralized planning is giving way to privatization, not only in the traditional regions but also in newly emerging regions of Asia, Africa, and Latin America. Further attempts are being made to bring planning-related decision making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners, or policymakers.

A Cultural History of Shopping in the Modern Age

Vicki Howard, 2022-06-02 A Cultural History of Shopping was a Library Journal Best in Reference selection for 2022. In the modern consumer age that emerged after the First World War, shopping became a ubiquitous cultural practice. Despite its apparent universality, the historicity and contingency of shopping should not be ignored; its meaning was always inextricably linked to the political, material, and economic contexts within which it took place. Gendered female for the most part, shopping continued to evoke different cultural responses: embraced as liberatory by some, condemned as frivolous by others. Business decisions and public policies helped construct the frameworks within which new, often American-led shopping cultures emerged, from downtown department stores to chain stores to suburban shopping malls. The digital revolution in shopping that began in the last decade of the 20th century has changed the face of cities and towns and led to the closure of many bricks-and-mortar stores, but as this volume explores, the shopper remains very much at the center of Western capitalist societies. A Cultural History of Shopping in the Modern Age presents an overview of the period with themes addressing practices and processes, spaces and places, shoppers and identities, luxury and everyday, home and family, visual and literary representations, reputation, trust, and credit, and governance, regulation, and the state.
