Learning PyTorch 2.0 Matthew Rosch, 2023-07-01 This book is a comprehensive guide to understanding and utilizing PyTorch 2.0 for deep learning applications It starts with an introduction to PyTorch its various advantages over other deep learning frameworks and its blend with CUDA for GPU acceleration We delve into the heart of PyTorch tensors learning their different types properties and operations Through step by step examples the reader learns to perform basic arithmetic operations on tensors manipulate them and understand errors related to tensor shapes A substantial portion of the book is dedicated to illustrating how to build simple PyTorch models This includes uploading and preparing datasets defining the architecture training and predicting It provides hands on exercises with a real world dataset The book then dives into exploring PyTorch's nn module and gives a detailed comparison of different types of networks like Feedforward RNN GRU CNN and their combination Further the book delves into understanding the training process and PyTorch's optim module It explores the overview of optimization algorithms like Gradient Descent SGD Mini batch Gradient Descent Momentum Adagrad and Adam A separate chapter focuses on advanced concepts in PyTorch 2.0 like model serialization optimization distributed training and PyTorch Quantization API In the final chapters the book discusses the differences between

TensorFlow 2.0 and PyTorch 2.0 and the step by step process of migrating a TensorFlow model to PyTorch 2.0 using ONNX It provides an overview of common issues encountered during this process and how to resolve them Key Learnings A comprehensive introduction to PyTorch and CUDA for deep learning Detailed understanding and operations on PyTorch tensors Step by step guide to building simple PyTorch models Insight into PyTorch's nn module and comparison of various network types Overview of the training process and exploration of PyTorch's optim module Understanding advanced concepts in PyTorch like model serialization and optimization Knowledge of distributed training in PyTorch Practical guide to using PyTorch's Quantization API Differences between TensorFlow 2.0 and PyTorch 2.0 Guidance on migrating TensorFlow models to PyTorch using ONNX Table of Content Introduction to Pytorch 2.0 and CUDA 11.8 Getting Started with Tensors Advanced Tensors Operations Building Neural Networks with PyTorch 2.0 Training Neural Networks in PyTorch 2.0 PyTorch 2.0 Advanced Migrating from TensorFlow to PyTorch 2.0 End to End PyTorch Regression Model Audience A perfect and skillful book for every machine learning engineer data scientist AI engineer and data researcher who are passionately looking towards drawing actionable intelligence using PyTorch 2.0 Knowing Python and the basics of deep learning is all you need to sail through this book

Hands-On Deep Learning with Go Gareth Seneque, Darrell Chua, 2019-08-08 Apply modern deep learning techniques to build and train deep neural networks using Gorgonia Key Features Gain a practical understanding of deep learning using Golang Build complex neural network models using Go libraries and Gorgonia Take your deep learning model from design to deployment with this handy guide Book Description Go is an open source programming language designed by Google for handling large scale projects efficiently The Go ecosystem comprises some really powerful deep learning tools such as DQN and CUDA With this book you'll be able to use these tools to train and deploy scalable deep learning models from scratch This deep learning book begins by introducing you to a variety of tools and libraries available in Go It then takes you through building neural networks including activation functions and the learning algorithms that make neural networks tick In addition to this you'll learn how to build advanced architectures such as autoencoders restricted Boltzmann machines RBMs convolutional neural networks CNNs recurrent neural networks RNNs and more You'll also understand how you can scale model deployments on the AWS cloud infrastructure for training and inference By the end of this book you'll have mastered the art of building training and deploying deep learning models in Go to solve real world problems What you will learn Explore the Go ecosystem of libraries and communities for deep learning Get to grips with Neural Networks their history and how they work Design and implement Deep Neural Networks in Go Get a strong foundation of concepts such as Backpropagation and Momentum Build Variational Autoencoders and Restricted Boltzmann Machines using Go Build models with CUDA and benchmark CPU and GPU models Who this book is for This book is for data scientists machine learning engineers and AI developers who want to build state of the art deep learning models using Go Familiarity with basic machine learning concepts and Go programming is required to get the best out of this book

Linux Rheinwerk

Publishing, Inc, Michael Kofler, 2025-06-17 Master Linux installation shell scripting system tuning and server setup with clear practical guidance for all skill levels Key Features Comprehensive content spanning from installation to server configuration ensures wide applicability Detailed shell scripting sections explain core concepts for automation In depth system and network administration guidance covers real world scenarios Book Description This guide begins with Linux fundamentals including an overview of its history distributions and installation methods Readers learn to install Linux on various hardware configurations while understanding open source licensing and partitioning The book then introduces desktop environments like GNOME and KDE showing how to navigate and customize them for productivity Building on this foundation readers develop command line proficiency mastering terminal usage and shell scripting with Bash and Zsh The book covers file and process management network tools and package management giving readers confidence to optimize and secure their systems Later chapters dive into system administration topics such as kernel compilation bootloader configuration and virtualization with VirtualBox and QEMU Finally the book focuses on server installation secure shell configuration web and mail server setup and file sharing via Samba It also addresses backup strategies firewall setup and security enhancements with SELinux and AppArmor preparing readers to maintain reliable secure Linux environments in professional or personal contexts What you will learn Install and configure Linux on various popular distributions Customize and operate GNOME and KDE desktop environments efficiently Create debug and automate tasks using Bash and Zsh shell scripts Manage files permissions and processes through command line tools Set up and secure network services including SSH and Apache servers Deploy virtual machines and maintain Linux servers with best practices Who this book is for This book is designed for learners eager to understand Linux deeply from beginners to intermediate users It is ideal for hobbyists IT professionals and students with basic computer literacy who want to progress from installation through system configuration to advanced server and security management

Generative AI from Beginner to Paid Professional, Part 3 Bolakale

Aremu, 2024-11-19 Dive deep into the world of Hugging Face and unlock the tools you need to create fine tune and deploy state of the art AI models Part 3 of the Generative AI from Beginner to Paid Professional series is your complete guide to mastering Hugging Face's powerful ecosystem through practical projects and real world applications This book takes you beyond the basics providing hands on exercises and expert insights to help you leverage Hugging Face for NLP vision tasks and beyond You'll not only learn to work with pretrained models but also gain the skills to customize and deploy AI solutions that solve real world problems What's inside Practical Hands On Learning Master Hugging Face tools by building projects like text summarization chatbots and image classification Advanced Techniques Learn fine tuning model optimization and efficient inference for high performance applications Real World Deployments Understand how to host models on Hugging Face Spaces and integrate them into pipelines with tools like LangChain Production Ready Projects Get step by step guidance on creating deployable AI solutions from concept to implementation By the end of this book you'll have the

confidence and skills to design and deliver professional grade AI solutions whether for personal projects freelance opportunities or enterprise applications Who this book is for This guide is perfect for data scientists AI enthusiasts and developers eager to take their skills to the next level and monetize their knowledge Whether you re a student or a professional Part 3 will prepare you to build innovative solutions and thrive in the booming AI industry Take the leap into AI mastery and start creating the future

Practical Deep Learning for Cloud, Mobile, and Edge Anirudh Koul,Siddha Ganju,Meher Kasam,2019-10-14 Whether you re a software engineer aspiring to enter the world of deep learning a veteran data scientist or a hobbyist with a simple dream of making the next viral AI app you might have wondered where to begin This step by step guide teaches you how to build practical deep learning applications for the cloud mobile browsers and edge devices using a hands on approach Relying on years of industry experience transforming deep learning research into award winning applications Anirudh Koul Siddha Ganju and Meher Kasam guide you through the process of converting an idea into something that people in the real world can use Train tune and deploy computer vision models with Keras TensorFlow Core ML and TensorFlow Lite Develop AI for a range of devices including Raspberry Pi Jetson Nano and Google Coral Explore fun projects from Silicon Valley s Not Hotdog app to 40 industry case studies Simulate an autonomous car in a video game environment and build a miniature version with reinforcement learning Use transfer learning to train models in minutes Discover 50 practical tips for maximizing model accuracy and speed debugging and scaling to millions of users

Hands-On Artificial Intelligence for Beginners Patrick D. Smith,2018-10-31 Grasp the fundamentals of Artificial Intelligence and build your own intelligent systems with ease Key FeaturesEnter the world of AI with the help of solid concepts and real world use casesExplore AI components to build real world automated intelligenceBecome well versed with machine learning and deep learning conceptsBook Description Virtual Assistants such as Alexa and Siri process our requests Google s cars have started to read addresses and Amazon s prices and Netflix s recommended videos are decided by AI Artificial Intelligence is one of the most exciting technologies and is becoming increasingly significant in the modern world Hands On Artificial Intelligence for Beginners will teach you what Artificial Intelligence is and how to design and build intelligent applications This book will teach you to harness packages such as TensorFlow in order to create powerful AI systems You will begin with reviewing the recent changes in AI and learning how artificial neural networks ANNs have enabled more intelligent AI You ll explore feedforward recurrent convolutional and generative neural networks FFNNs RNNs CNNs and GNNs as well as reinforcement learning methods In the concluding chapters you ll learn how to implement these methods for a variety of tasks such as generating text for chatbots and playing board and video games By the end of this book you will be able to understand exactly what you need to consider when optimizing ANNs and how to deploy and maintain AI applications What you will learnUse TensorFlow packages to create AI systemsBuild feedforward convolutional and recurrent neural networksImplement generative models for text generationBuild reinforcement learning algorithms to play gamesAssemble

RNNs CNNs and decoders to create an intelligent assistant Utilize RNNs to predict stock market behavior Create and scale training pipelines and deployment architectures for AI systems Who this book is for This book is designed for beginners in AI aspiring AI developers as well as machine learning enthusiasts with an interest in leveraging various algorithms to build powerful AI applications

Test Yourself On Build a Large Language Model (From Scratch) ,2025-07-22 Learn how to create train and tweak large language models LLMs by building one from the ground up Sebastian Raschka s bestselling book Build a Large Language Model From Scratch is the best way to learn how Large Language Models function It uses Python and the PyTorch deep learning library It s a unique way to learn this subject which some believe is the only way to truly learn you build a model yourself Even with the clear explanations diagrams and code in the book learning a complex subject is still hard This Test Yourself guide intends to make it a little easier The structure mirrors the structure of Build a Large Language Model From Scratch focusing on key concepts from each chapter You can test yourself with multiple choice quizzes questions on code and key concepts and questions with longer answers that push you to think critically The answers to all questions are provided Depending on what you know at any point this Test Yourself guide can help you in different ways It will solidify your knowledge if used after reading a chapter But it will also benefit you if you digest it before reading By testing yourself on the main concepts and their relationships you are primed to navigate a chapter more easily and be ready for its messages We recommend using it before and after reading as well as later when you have started forgetting Repeated learning solidifies our knowledge and integrates it with related knowledge already in our long term memory What s inside Questions on code and key concepts Critical thinking exercises requiring longer answers Answers for all questions About the reader For readers of Build a Large Language Model From Scratch who want to enhance their learning with exercises and self assessment tools About the author Curated from Build a Large Language Model From Scratch
