A Philosophy of Data Science Solomon Major, 2025-09-01 A common definition for a data scientist is someone who uses data to solve problems A Philosophy of Data Science starts with

the premise that it is not only important that one can solve problems but that they are able to articulate them as well Unfortunately the critical skill of asking the right question rather than simply finding the right answers has been neglected by much of the data and computational social science literature This book is intended to address this gap A Philosophy of Data Science begins by showing that the assumptions beliefs and goals that motivate the specification and application of data science models are based both on data the focus of the data and computational social sciences but also on theoretical and philosophical considerations as well It has been written to develop a set of rules and tools that can help inform data and computational social scientists on how to best use the awesome methods that they now have at their disposal Thus this book is not a replacement for the impressive corpora of method oriented data science literature used by today s quantitative analysts but a complement to these contributions one that uses philosophy to help motivate the questions to which they seek to give technical answers

Proceedings of the International Conference on Law Reform (5th Inclar 2024) Sholahuddin Al-Fatih, Hilaire Tegnan, Muhamad Helmi Bin Md Said, Nur Rohim Yunus, Abdullah Saeed, Fokke J. Fernhout, Teng Junaidi Gunawan, M. Najih, Jady Zaidi Hassim, Dewa Gede Sudika Mangku, Hasnan Bachtiar, Fifik Wiryani, Hikmahanto Juwana, Sonny Zulhuda, Muhammad Fauzan, 2025-02-27. Law is a set of rules made to foster regularity and guarantee safety and certainty for citizens. The existence of Law is intended to maintain social order and control societal changes into something as expected. Both law and humanity are inextricable and they work in harmony. Therefore, the formulation and enforcement must take place simultaneously. This view is relevant to the idea of Prof. Satjipto Raharjo in his progressive legal theory, believing that law is born for human beings, not the other way around. In other words, the law should keep moving to maintain the people's welfare and to ensure that the certainty, justice, and utility of the law are guaranteed. Recently, the world has been faced with seemingly unstoppable humanitarian crises. Prolonged conflict has caused severe losses affecting physical, economic, and psychological conditions, and no diplomatic and repressive actions have managed to stop this issue. In such a situation, the law should play its role in protecting those affected by this inhuman conflict. However, international and national laws seem to be left as nothing but mere meaningless written rules that fail to address this existing problem. In such a situation, humanity is being disrupted, which it sees a change of meaning, triggering a critical situation and blurring it. This situation also indicates that these days humanity is facing challenges. Departing from this perspective, the Faculty of Law, Universitas Muhammadiyah Malang, holds the 5th International Conference of Law and Call for Papers with the Theme: Redefining Humanity Values as the Basis of

Legal Reasoning Challenges in the Disruption Era From this conference we expect to welcome more ideas of redefining the significance of humanity toward the law in the existing challenges
