story of how the unleashing of individual public opinion and rage became the most valuable of political currency The digital s sharding of experience through personal networks platforms recommendations and peer linked sources has splintered political awareness experience and activity Rage resentment hypocrisy and a hyporeal self curated reality have fractured the political landscape This book takes the rise of Donald J Trump as both a symptom and a catalyst of this phenomenon embodying the public s disenchantment with liberal democracy and its embrace of a more visceral emotionally driven politics We consider how economic devastation wrought by global neoliberalism and zombie capitalism fuelled public rage against the mainstream ending in a supreme yet odd coalition for Trump with an elite which leveraged technology with anti democratic sentiments to further its goals We show how the liberal mainstream news media MSM made facts and truth their USP their core pitch for trust in precisely the period when they became most elusive It was the MSM that seduced a middle ground of America to believe that they were reality pushing the deplorables to its margins until the margins became the reality

Path to Singularity J. Craig Wheeler, 2024-11-19 In a rapidly changing world are we on the brink of creating technology that outpaces our ability to control it Astrophysicist J Craig Wheeler former president of the American Astronomical Society takes a critical look at the technological advances shaping our future From artificial intelligence to genetic engineering Wheeler explores how these innovations are interconnected and the potential they hold for humanity s evolution He warns of a future where autonomous machines outsmart us and genetic modifications challenge our very essence With thought provoking insights into the ethical dilemmas we face Wheeler stresses the importance of staying informed and proactive

Key Questions Raised by Wheeler Will there be jobs for those willing to work in a future dominated by automation How might social media companies manipulate our decisions potentially stripping us of free will Could AI influence or even dictate our voting behaviors If widespread mental connectivity becomes a reality could we see the emergence of a collective consciousness that erases individuality Have we exhausted Earth s resources and is population control necessary What implications arise if we solve aging How will society adapt to the challenges of perpetual youth What are the realistic prospects of migrating to space as Earth becomes increasingly inhospitable Our decisions today will determine if we control technology or if it controls us

Through an engaging narrative Wheeler not only outlines the challenges but also offers practical advice on how we can retain control over our technological destiny Includes a Foreword by Neil DeGrasse Tyson
