and the ten technological advances that disrupted it over the last century. In recent years, narratives about the music industry tend to hew to a common theme: it was humming along for decades until the Internet and Napster came along and disrupted it. Key Changes shows that this view is incorrect: the industry was actually shaken up not once in the 1990s but ten times over more than 100 years. These ten disruptions came with the introduction of new formats for enjoying recorded music, starting with the cylinders and discs played on early phonographs, then moving through radio, LPs, tapes, CDs, television, digital downloads, streaming, and streaming video, and then into Artificial Intelligence (AI), which enables a wide range of new capabilities with profound impacts upon the business. This book devotes a chapter to each of these formats, illustrating how such innovations beget shifts in creativity, consumer behavior, economics, and law. Each of the technological innovations covered in this book not only disrupted the music business but also fundamentally altered the industry's character. And while the technologies themselves have evolved in unique and varied ways over the decades, the changes within the business follow a clear pattern. Veteran music industry professionals and music technology experts, Howie Singer and Bill Rosenblatt, illuminate this pattern through a framework they term the 6 Cs: cutting edge technology, channels of distribution, creators, consumers, cash, and copyright. This framework provides insight into how such disparate innovations similarly disrupted and transformed the music business in each era. Extensively researched and supplemented by interviews with Grammy-winning artists, producers, and executives, the book provides an insightful perspective on the ways technology has fundamentally altered the music industry throughout history and into the present era.

Competing with Disruptive Business Models in Traditional Industries. Conceptualisation of a Strategic Framework Nils Berkemeyer, 2016-05-06. Master's Thesis from the year 2015 in the subject Business Economics, Business Management, Corporate Governance, grade 1.0. Cass Business School, language English, abstract: An increasing number of journalistic articles and academic literature deal with the struggle of established companies to fend off the attacks by industry newcomers such as Airbnb, Spotify, Netflix, Google, and many others. These companies enter traditional industries with innovative business models and compete in a manner which makes it challenging for incumbent firms to understand

their novel competition and respond effectively This study introduces a typology of three stages of industry disruption that classify the newcomer's developmental stage and describe the incumbent's competitive position in terms of competition intensity and remaining time to respond It is demonstrated how incumbents may conduct their strategic reasoning along these stages to arrive at a strategic goal and evaluate possible counter measures
