AI Tools* Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of
generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language
models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational
content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally
LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown
potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers
with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications
such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields
understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI
tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts
to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but

instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies
