Teaching Mathematics Through Cross-Curricular Projects Elizabeth A. Donovan, Lucas A. Hoots, Lesley W. Wigglesworth, 2024-07-22 This book offers engaging cross curricular modules to supplement a variety of pure mathematics courses Developed and tested by college instructors each activity or project can be integrated into an instructor's existing class to illuminate the relationship between pure mathematics and other subjects Every chapter was carefully designed to promote active learning strategies The editors have diligently curated a volume of twenty six independent modules that cover topics from fields as diverse as cultural studies the arts civic engagement STEM topics and sports and games An easy to use reference table makes it straightforward to find the right project for your class Each module contains a detailed description of a cross curricular activity as well as a list of the recommended prerequisites for the participating students The reader will also find suggestions for extensions to the provided activities as well as advice and reflections from instructors who field tested the modules Teaching Mathematics Through Cross Curricular Projects is aimed at anyone wishing to demonstrate the utility of pure mathematics across a wide selection of real world scenarios and academic disciplines Even the most experienced instructor will find something new and surprising to enhance their pure mathematics courses **The Mathematics Teacher**, 1925

Mathematics of Optimization: How to do Things Faster Steven J. Miller, 2017-12-20 Optimization Theory is an active area of research with numerous applications many of the books are designed for engineering classes and thus have an emphasis on problems from such fields Covering much of the same material there is less emphasis on coding and detailed applications as the intended audience is more mathematical There are still several important problems discussed especially scheduling problems but there is more emphasis on theory and less on the nuts and bolts of coding A constant theme of the text is the why and the how in the subject Why are we able to do a calculation efficiently How should we look at a problem Extensive effort is made to motivate the mathematics and isolate how one can apply ideas perspectives to a variety of problems As many of the key algorithms in the subject require too much time or detail to analyze in a first course such as the run time of the Simplex Algorithm there are numerous comparisons to simpler algorithms which students have either seen or can quickly learn such as the Euclidean algorithm to motivate the type of results on run time savings Practical Handbook of School Psychology Gretchen Gimpel Peacock, Ruth A.
