It explores digitalized markets through empirically based theorizing concerning the consequences of digitalization for mundane markets. The individual chapters explore several mundane markets, including personal transportation, temporary accommodation, fashion, clothing, concert tickets, and web shopping. They employ a variety of useful concepts and methods to approach the complexity of digitalization of markets. Based on these accounts, the digitalization of markets is conceived as comprising transformation of three main aspects of markets. First, digitalization transforms the elements of markets, such as actors, devices, objects, and places that contribute to constitute markets. Second, digitalization alters market processes or developmental event sequences by changing the activities that contribute to produce the market and thus how markets develop and take form. Third, digitalization has implications for the overall forms that markets assume in terms of how market elements and processes are linked and organized. The volume provides important

contributions to our understanding of digitalized markets both through rich empirical accounts of a variety of market contexts and through conceptual developments that improve our ability to analytically deal with the market consequences of digitalization The chapters in this book were originally published as a special issue of Consumption Markets Culture
