unsecured credit market Using a unique data set of credit card mailings the authors directly explore the supply of unsecured credit to consumers with the most conspicuous default risk those with a bankruptcy history On average over one fifth of personal bankruptcy filers receive at least one offer in a given month with the likelihood being even higher for those who filed for bankruptcy within the previous two years However offers to bankruptcy filers carry substantially less favorable terms than those to comparable consumers without a bankruptcy history with higher interest rates lower credit limits a greater likelihood of having an annual fee and a smaller likelihood of having rewards or promotions In addition this analysis of credit terms typically disclosed only in the fine print suggests that offers to filers tend to include more hidden costs Tables This is a print on demand report *H.R. 2440, Credit and Charge Card Disclosure Amendments of 1991* United States.
