Beauty Matters Yael Reisner, 2019-10-21 Beauty in architecture matters again This issue of AD posits that after 80 years of aggressive suppression of engagement with aesthetics the temporarily dormant preoccupation with beauty is back This is evidenced by a current cultural shift from the supposedly objective to an emerging trust in the subjective a renewed fascination for aesthetics supported by new knowledge emanating simultaneously from disparate disciplines Digital design continues to influence architectural discourse not only due to changes in manufacturing but also through establishing meaning The very term post digital was introduced by computational designers and artists who accept that digital gains in architectural design are augmented by human judgement and cognitive intuition The issue takes an interdisciplinary approach to this re emerging interest in beauty across neuroscience neuroaesthetics mathematics philosophy and architecture while discussing the work of the international architects in both practice and academe who are generating new aesthetics Contributors Alisa Andrasek Izaskun Chinchilla Marjan Colletti Peter Cook Robbert Dijkgraaf Winka Dubbeldam David Garcia Graham Harman Claudia Pasquero and Marco Poletto Alan Powers Gilles Retsin Kristina Schinegger and Stefan Rutzinger Fleur Watson and Martyn Hook and Semir Zeki Featured architects Archi Tectonics ecoLogicStudio NaJa deOstos Kazuyo Sejima Ryue Nishizawa SANAA soma architecture Studio Gang John Wardle Architects and Tom Wiscombe Architecture

**AHMM** Neil Spiller, 2021-05-10 AHMM is a premier international architectural practice Established over 30 years ago it has won numerous awards including the Stirling Prize

Through the contributions of journalists clients fellow professionals and academics this AD issue celebrates the practice s achievements in all areas of architectural production featuring archive material new works and unparalleled access to the AHMM organisation revealing new insights into their work and urban philosophies To get to this eminent position the office has consistently responded in innovative and imaginative ways to the changing imperatives of art science and economics that influence our built environment These parameters have metamorphosed considerably since AHMM was founded in terms of advances in digitisation material science and changes to contract management what constitutes sustainability procurement routes construction methods collaboration and architectural education Above all this AD will explore AHMM s practice as a holistic design project in itself in terms of building buildings but also in using a design ethos to cope with shifts in workload and the firm s varying business activities and its administration over the years thus providing insight for a future generation of potentially successful architectural professionals

Neuroarchitecture Ian Ritchie,2020-12-21 Applying the insights of neuroscience to architecture has the potential to deliver buildings and spaces that measurably promote well being and create healthier or more effective environments for specific activities There is however a risk that neuroarchitecture will become just another buzzword a passing architectural fashion or a marketing exercise just as eco green and sustainable have become This issue

of AD offers the reader an alternative to neuro sound bites and exposes them to the thinking which led to the design of the Sainsbury Wellcome Centre for Neural Circuits and Behaviour SWC a pioneering medical research facility designed to foster collaboration between researchers Multi award winning the SWC was one of the first buildings in the world designed to take into account what has been learned about how the work space affects behaviour and is a highly effective building in which to work Readers will gain a richer deeper insight into the complex mental and existential aspects of architecture design and our many senses how they interact and might interact in the future and how that knowledge can be used to design more effective buildings and built environments

*Production Urbanism* Dongwoo Yim, Rafael Luna, 2021-09-27 The Industrial Revolution caused a paradigm shift from an agrarian economy to a manufacturing economy giving birth to the industrial city City became synonymous with a concentration of factories causing unfiltered scenes between centres of production and urban dwellings The corrupted image of the city ultimately led to the displacement and separation of production away from residential zones in the 20th century However new innovative manufacturing technologies are allowing a coexistence between factories and dwellings through hybrid typologies that blend production back into the urban fabric This AD issue discusses the implications of the re emergence of production as an architectural and urban agenda through hybrid models that engage a new socioeconomic shift Given the contemporary circumstances of a global pandemic affecting global supply chains it is necessary to deliver a vision for a new productive urbanism that allows autonomous circular economies to flourish Our 21st century cities have an obligation to explore a new industrial revolution of shared economies that optimise the use of the legacy systems infrastructure and building stock Yet it is ultimately up to architecture to take arms in delivering new typologies Contributors Frank Barkow Michele Bonino and Maria Paola Repellino Kristiaan Borret Vicente Guallart Tali Hatuka Doojin Hwang Yerin Kang and Chihoon Lee Kengo Kuma Wesley Leeman Scott Lloyd and
