Gaming Democracy Adrienne L. Massanari, 2024-10-15 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In Gaming Democracy Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and

game studies as well as the concept of metagaming Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism

**Social Media Analytics, Strategies and Governance** Hamid Jahankhani, Stefan Kendzierskyj, Reza Montasari, Nishan Chelvachandran, 2022-08-18 Social media has spread rapidly on the global stage driving consumers attention and influence both consciously and subconsciously Whilst this type of platform may have been initially designed as a tool for open communication and expression it is also being utilized as a digital tool with widescale use cases The intelligence explosion information overload and disinformation play a significant part regarding individual group and country perceptions The complex nature of this data explosion created an increasing demand and use of artificial intelligence AI and machine learning ML to help provide big insights to big data AI and ML enable the analysis and dissemination of vast amounts of data however the ungoverned pace at which AI and autonomous systems have been deployed has created

unforeseen problems Many algorithms and AI systems have been trained on limited or unverified datasets creating inbuilt and unseen biases Where these algorithmic tools have been deployed in high impact systems there are documented occurrences of disastrous decision making and outcomes that have negatively impacted people and communities Little to no work had been conducted in its vulnerability and ability to exploit AI itself So AI and autonomous systems whilst being a force for societal good could have the potential to create and exacerbate societies greatest challenges This is a cohesive volume that addresses challenging problems and presents a range of innovative approaches and discussion     *Social Media and Politics in Turkey* , Erkan Saka,2019-11-20 This book focuses on media and zeroes in some critical and oppositional aspects of internet usage within Turkey It does not radically challenge some works on Turkey s recent grand narrative but presents empirical and minor accounts to this However in elaborating the long history of relatively resilient and multilayered oppositional digital media networks in Turkey this book insists that an idea of authoritarian turn may be misleading as the internet communications are exposed to repressive measures and surveillance tactics from the very beginning of the country s recent past While discussing from citizen journalism practices to political trolls and from Gezi Park protests to disinformation campaigns this book pays tribute to digital activists and points out that mobilizing through digital networks can present glimmers of hope in challenging authoritarian regimes
