Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object-based industry oriented around the production and exchange of physical recordings. In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally every element of the industry now must consider a new type of audience: the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments. *Billboard*, 2011-04-02 In its 114th year *Billboard* remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform. *Billboard* publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends.

Create, Produce, Consume David Bruenger, 2019-10-08 *Create Produce Consume* explores the cycle of musical experience for musicians professionals and budding entrepreneurs looking to break into the music industry. Building on the concepts of his previous book *Making Money Making Music* David Bruenger provides readers with a basic framework for understanding the relationships between the artist and audience and the producer consumer by examining the methods underlying creation production reception and creation consumption compensation. Each chapter offers a different perspective on the processes and structures that lead listeners to discover experience and interact with music and musical artists. Through case studies ranging from Taylor Swift's refusal to allow her music to be streamed on Spotify to the rise of artists supported through sites like Patreon Bruenger offers highly relevant real world examples of industry practices that shape our encounters with music. *Create Produce Consume* is a critical tool for giving readers the agile knowledge necessary to adapt to a rapidly changing music industry. Graphs tables lists for additional reading and questions for further discussion illustrate key concepts. Online resources for instructors and students will include sample syllabi lists for expanded reading and more.
