CLOUD AND INTERNET SECURITY Binh Nguyen, A while back I wrote two documents called Building a Cloud Service and the Convergence Report They basically documented my past experiences and detailed some of the issues that a cloud company may face as it is being built and run Based on what had transpired since a lot of the concepts mentioned in that particular document are becoming widely adopted and or are trending towards them This is a continuation of that particular document and will attempt to analyse the issues that are faced as we move towards the cloud especially with regards to security Once again we will use past experience research as well as current events trends in order to write this particular report Personal experience indicates that keeping track of everything and updating large scale documents is difficult and depending on the system you use extremely cumbersome The other thing readers have to realise is that a lot of the time even if the writer wants to write the most detailed book ever written it s quite simply not possible Several of my past works something such as this particular document takes a few weeks to a few months to write depending on how much spare time I have were written in my spare

Wireless Hacking: Projects for Wi-Fi Enthusiasts Lee Barken, 2004-10-29 Sales of wireless LANs to home users and small businesses will soar this year with products using IEEE 802.11 Wi-Fi technology leading the way according to a report by Cahners research Worldwide consumers will buy 7.3 million wireless LAN nodes which include client and network hub devices up from about 4 million last year This third book in the HACKING series from Syngress is written by the SoCalFreeNet Wireless Users Group and will

cover 802.11a/b/g Wi-Fi projects teaching these millions of Wi-Fi users how to mod and hack Wi-Fi access points network cards and antennas to run various Linux distributions and create robust Wi-Fi networks. Cahners predicts that wireless LANs next year will gain on Ethernet as the most popular home network technology. Consumers will hook up 10.9 million Ethernet nodes and 7.3 million wireless out of a total of 14.4 million home LAN nodes shipped. This book will show Wi-Fi enthusiasts and consumers of Wi-Fi LANs who want to modify their Wi-Fi hardware how to build and deploy homebrew Wi-Fi networks both large and small. Wireless LANs next year will gain on Ethernet as the most popular home network technology. Consumers will hook up 10.9 million Ethernet nodes and 7.3 million wireless clients out of a total of 14.4 million home LAN nodes shipped. This book will use a series of detailed inter-related projects to teach readers how to modify their Wi-Fi hardware to increase power and performance to match that of far more expensive enterprise networking products. Also features hacks to allow mobile laptop users to actively seek wireless connections everywhere they go. The authors are all members of the San Diego Wireless Users Group which is famous for building some of the most innovative and powerful home brew Wi-Fi networks in the world.

Advances in Internet, Data and Web Technologies Leonard Barolli, Juggapong Natwichai, Tomoya Enokido, 2021-02-18. This book presents original contributions to the theories and practices of emerging Internet data and web technologies and their applicability in businesses, engineering and academia. The Internet has become the most proliferative platform for emerging large scale computing paradigms. Among these data and web technologies are two most prominent paradigms in a variety of forms such as data centers, cloud computing, mobile cloud, mobile web services and so on. These technologies altogether create a digital ecosystem whose cornerstone is the data cycle from capturing to processing, analysis and visualization. The investigation of various research and development issues in this digital ecosystem is boosted by the ever increasing needs of real life applications which are based on storing and processing large amounts of data. As a key feature, this book addresses advances in the life cycle exploitation of data generated from the digital ecosystem, data technologies that create value for the knowledge and businesses toward a collective intelligence approach. Researchers, software developers, practitioners and students interested in the field of data and web technologies will find this book useful and a reference for their activity.
