Normal Instructor and Primary Plans, 1914 **Tubular Structures XVI** Amin Heidarpour, Xiao-Ling Zhao, 2017-11-13 Tubular Structures XVI contains the latest scientific and engineering developments in the field of tubular steel structures as presented at the 16th International Symposium on Tubular Structures ISTS16 Melbourne Australia 4-6 December 2017. The International Symposium on Tubular Structures ISTS has a long standing reputation for being the principal showcase for manufactured tubing and the prime international forum for presentation and discussion of research developments and applications in this field. Various key and emerging subjects in the field of hollow structural sections are covered such as special applications and case studies, static and fatigue behaviour of connections, joints, concrete filled and composite tubular members and offshore structures, earthquake and dynamic resistance, specification and standard developments, material properties and section forming, stainless and high strength steel structures, fire impact and blast response. Research and development issues presented in this topical book are applicable to buildings, bridges, offshore structures, cranes, trusses, and towers. Tubular Structures XVI is thus a pertinent reference source for architects, civil and mechanical engineers, designers, steel fabricators, and contractors, manufacturers of hollow sections or related construction products, trade associations involved with tubing owners or developers of tubular structures, steel specification committees, academics, and research students all around the world.
