Professor of Marketing at Rutgers University USA *Price Management* Hermann Simon, Martin Fassnacht, 2018-12-11 In this book the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of price theory and price policy, the authors coined the term price management to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, *pretium*, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research consulting and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors including consumer goods, industrial products, services, and trade distribution. In particular, they address the implications of technological advancements such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations such as flat rates, freemium, pay per use, or pay what you want. They also address the emergence of new price metrics: Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a bible for leaders who recognize that price is not only a means to drive profit in the short term but a tool to generate sustained growth in shareholder value over the longer term and a primer for researchers, instructors, and students alike. Praise for *Price Management*: This book is truly state of the art and the most comprehensive work in price management. Prof. Philip Kotler, Kellogg School of Management, Northwestern University. This very important book builds an outstanding bridge between science and practice. Kasper Rorsted, CEO Adidas. This book provides practical guidelines on value creation, communication, and management, which is an imperative for businesses to survive in the coming era of uncertainty. Dr. Chang Gyu Hwang, Chairman and CEO KT Corporation, Korea Telecom. *Global Meets Digital* Vinod Jain, 2023-06-02 The world today is at the intersection of two megatrends: Globalization and Digitalization, a business revolution unfolding in real time. *Global Meets Digital* captures the many nuances of this revolution succinctly, including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years, such as diminishing returns to scale and resource scarcity, are no longer valid for a large and growing number of products and services. The book will challenge you to think differently, not just about digital products but also about physical products. In the global digital world, products are of three kinds: physical, digital, and smart machines—products that are both physical and digital and connected to the Internet, a distinction missed by most books on strategy and global business. The economics of each kind of product is distinct from that of the others, which has strategic implications for all kinds of businesses, implications such as how to compete and how to create and capture value. With

several mini case studies and over 100 company examples the book covers themes and cutting edge issues like the paradox of globalization digital disruption disruptive business models exponential technologies Internet of Things competition in digital markets winner take all market dynamics Industry 4.0 how to innovate strategizing for the New Normal and value creation and value capture in both B2C and B2B contexts The book derives its underpinnings from the practice of global and digital business while theory remains in the background Intended specifically for an executive professional audience *Global Meets Digital* should also be of value to business students and professors learning to dip their toes into a digital world Vinod Jain is an expert in global and digital strategy award winning professor Fulbright Scholar and author of an MBA textbook *Global Strategy* He taught at the Rutgers Business School Newark and New Brunswick and the Robert H Smith School of Business University of Maryland College Park At Maryland he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China Since leaving Maryland he has taught in China Denmark Finland Poland and India as a visiting or term professor His opinion pieces have appeared in *The Washington Post* *The Baltimore Sun* *Mensa Bulletin* and *Economic Times* and *Mint India*'s 1 and 2 business dailies among other media In the past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta
