Understanding IPTV Gilbert Held, 2006-10-25 Driven by a combination of technological improvements and commercial pressure interest in IPTV services has increasingly grown IPTV refers to the use of the Internet protocol required for delivery of television content IPTV represents an emerging technology that could change the manner in which homes receive entertainment personal computers operate and people use cell phones Beginning with a comprehensive introduction Understanding IPTV examines concepts applications and possible impacts of IPTV The book covers market drivers and developing IPTV infrastructure It explains television concepts including several popular compression standards and considers the TCP IP protocol suite It also identifies so called last mile solutions and details the operation and utilization of hardware and software components required to view television content delivered over different types of IP networks The author addresses the industry players and alliances providing an understanding of companies that are working with the technology Concluding with examples of the use of IPTV he illustrates the potential of this evolving technology Exploring the current state of the IPTV market business opportunities and trial services worldwide Understanding IPTV discusses the advantages that IPTV offers network operators and the new revenue streams that may emerge It presents different IPTV technologies and the products that manufacturers are bringing to the market

Chemical Process Design and Simulation: Aspen Plus and Aspen Hysys Applications Juma Haydary, 2019-01-16 A comprehensive and example oriented text for the study of chemical process design and simulation Chemical Process Design and Simulation is an accessible guide

that offers information on the most important principles of chemical engineering design and includes illustrative examples of their application that uses simulation software A comprehensive and practical resource the text uses both Aspen Plus and Aspen Hysys simulation software The author describes the basic methodologies for computer aided design and offers a description of the basic steps of process simulation in Aspen Plus and Aspen Hysys The text reviews the design and simulation of individual simple unit operations that includes a mathematical model of each unit operation such as reactors separators and heat exchangers The author also explores the design of new plants and simulation of existing plants where conventional chemicals and material mixtures with measurable compositions are used In addition to aid in comprehension solutions to examples of real problems are included The final section covers plant design and simulation of processes using nonconventional components This important resource Includes information on the application of both the Aspen Plus and Aspen Hysys software that enables a comparison of the two software systems Combines the basic theoretical principles of chemical process and design with real world examples Covers both processes with conventional organic chemicals and processes with more complex materials such as solids oil blends polymers and electrolytes Presents examples that are solved using a new version of Aspen software ASPEN One 9 Written for students and academics in the field of process design

Chemical Process Design and Simulation is a practical and accessible guide to the chemical process design and simulation using proven software

Learning and Intelligent Optimization Ilias S. Kotsireas, Panos M. Pardalos, 2020-07-17 This book constitutes the refereed post conference proceedings on Learning and Intelligent Optimization LION 14 held in Athens Greece in May 2020 The 37 full papers presented together with one invited paper have been carefully reviewed and selected from 75 submissions LION deals with designing and engineering ways of learning about the performance of different techniques and ways of using past experience about the algorithm behavior to improve performance in the future Intelligent learning schemes for mining the knowledge obtained online or offline can improve the algorithm design process and simplify the applications of high performance optimization methods Combinations of different algorithms can further improve the

robustness and performance of the individual components Due to the COVID 19 pandemic LION 14 was not held as a physical meeting

High Performance Computing Mateo Valero,Kazuki Joe,Masaru Kitsuregawa,Hidehiko Tanaka,2003-06-29 I wish to welcome all of you to the International Symposium on High Performance Computing 2000 ISHPC 2000 in the megalopolis of Tokyo After having two great successes with ISHPC 97 Fukuoka November 1997 and ISHPC 99 Kyoto May 1999 many people have requested that the symposium would be held in the capital of Japan and we have agreed I am very pleased to serve as Conference Chair at a time when high performance computing HPC has a significant influence on computer science and technology In particular HPC has had and will continue to have a significant impact on the advanced technologies of the IT revolution The many conferences and symposiums that are held on the subject around the world are an indication of the importance of this area and the interest of the research community One of the goals of this symposium is to provide a forum for the discussion of all aspects of HPC from system architecture to real applications in a more informal and personal fashion Today we are delighted to have this symposium which includes excellent invited talks tutorials and workshops as well as high quality technical papers

Leverage Data Streams for Better Operational Decision-Making Christoph Prinz,2023-05-31 Smart sustainable mobility ecosystems promise to address society's expectation of environmentally friendly on demand mobility While the technology stack to build such ecosystems is just around the corner in the form of connected automated and electric vehicles strategies to deploy and operate such fleets in a coordinated manner must still be advanced Most of such optimization challenges highly depend on the nature of customer demand vehicle supply and environmental influences Hence this dissertation investigates how available data streams from mobility ecosystems can be leveraged in Information Systems to solve related decision problems The overarching goal of this work is to generate design knowledge to improve vehicle availability provider profitability and environmental sustainability for such ecosystems Applying quantitative methods to real world data from shared vehicle systems generates insights into the nature of demand and supply Combining it with an analysis of empirical research on vehicle relocation algorithms builds the foundation for two artifact designs The first artifact enables the development and simulation based evaluation of operation modes for vehicle fleets The second artifact enables artificial intelligence based decision support for the vehicle rebalancing problem The insights are finally incorporated and generalized to a nascent

design theory on data enabled operational decision making in the context of smart sustainable mobility environments The findings have multifaceted implications for researchers concerned with data enabled value creation in Green IS shared economy and smart mobility and business analytics and data science Furthermore guidance for fleet providers to improve system attractiveness and for society to experience the potential amount of vehicle access without personal ownership is provided

Querying And Mining Uncertain Data Streams Cheqing Jin,Aoying Zhou,2016-05-24 Data uncertainty widely exists in many applications and an uncertain data stream is a series of uncertain tuples that arrive rapidly However traditional techniques for deterministic data streams cannot be applied to deal with data uncertainty directly due to the exponential growth of possible solution space This book provides a comprehensive overview of the authors work on querying and mining uncertain data streams Its contents include some important discoveries dealing with typical topics such as top k query ER Topk query rarity estimation set similarity and clustering Querying and Mining Uncertain Data Streams is written for professionals researchers and graduate students in data mining and its various related fields

International Tables for Crystallography, Volume F Eddy Arnold,Daniel M. Himmel,Michael G. Rossmann,2012-03-05 International Tables for Crystallography Volume F is an expert guide to macromolecular crystallography for the structural biologist It was commissioned by the International Union of Crystallography in recognition of the extraordinary contributions that knowledge of macromolecular structure has made and will make to the analysis of biological systems from enzyme catalysis to the workings of a whole cell The volume covers all stages of a crystallographic analysis from the preparation of recombinant proteins through crystallization diffraction data collection phase determination structure validation and structure analysis Although the volume is written for experienced scientists it is recognized that the reader is more likely to be a biologist interested in structure than a classical crystallographer interested in biology Thus there are chapters on the fundamentals history and current perspectives of macromolecular crystallography as well as on useful programs and databases such as the Protein Data Bank Each chapter is written by one or more internationally recognized experts This second edition features 19 new articles and many articles from the first edition have been revised The new articles cover topics such as standard definitions for quality indicators expression of membrane proteins protein engineering high throughput crystallography radiation damage merohedral

twinning low resolution ab initio phasing robotic crystal loading whole cell X ray diffraction imaging and halogen interactions in biological crystal structures There are also new articles on relevant software including software for electron microscopy These enhancements will ensure that Volume F continues to be a key reference for macromolecular crystallographers and structural biologists More information on the series can be found at <http://it.iucr.org>

Design and Control of Distillation Systems for Separating Azeotropes William L. Luyben, I-Lung Chien, 2011-12-06 Hands on guidance for the design control and operation of azeotropic distillation systems Following this book's step by step guidance readers learn to master tested and proven methods to overcome a major problem in chemical processing the distillation and separation of azeotropes Practical in focus the book fully details the design control and operation of azeotropic distillation systems using rigorous steady state and dynamic simulation tools Design and Control of Distillation Systems for Separating Azeotropes is divided into five parts Fundamentals and tools Separations without adding other components Separations using light entrainer heterogeneous azeotropic distillation Separations using heavy entrainer extractive distillation Other ways for separating azeotropes The distillation methods presented cover a variety of important industrial chemical systems including the processing of biofuels For most of these chemical systems the authors explain how to achieve economically optimum steady state designs Moreover readers learn how to implement practical control structures that provide effective load rejection to manage disturbances in throughput and feed composition Trade offs between steady state energy savings and dynamic controllability are discussed helping readers design and implement the distillation system that best meets their particular needs In addition economic and dynamic comparisons between alternative methods are presented including an example of azeotropic distillation versus extractive distillation for the isopropanol water system With its focus on practical solutions Design and Control of Distillation Systems for Separating Azeotropes is ideal for engineers facing a broad range of azeotropic separation problems Moreover this book is recommended as a supplemental text for undergraduate and graduate engineering courses in design control mass transfer and bio processing
