Relevant Query Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21
This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data. In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion i.e. reactively is one of the most important performance indicators especially when the distributed data is evolving. The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time. A limited refresh budget guarantees the reactivity of the system. Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field.

Interactive Multimedia and Next Generation Networks Vincent Roca, Franck Rousseau, 2004-10-26
Interactive Distributed Multimedia Systems IDMS and Protocols for Multimedia Systems PROMS have been two successful series of international events bringing together researchers, developers and practitioners from academia and industry in all areas of multimedia systems. These two workshops successfully merged in 2003 and now constitute the MIPS workshop. After the outstanding MIPS 2003 workshop organized in Naples, Italy by Giorgio Ventre and Roberto Canonico from the University of Naples Federico II, MIPS 2004 moved to Grenoble, France. Following the great tradition MIPS 2004 was intended to contribute to scientific, strategic and practical advances in the area of distributed multimedia applications, protocols and intelligent management tools with emphasis on their provision over novel network architectures. This is undoubtedly a rather broad area which is confirmed by the large range of topics that were addressed in the submitted and accepted papers. This year the Call for Papers attracted 74 submissions essentially from Europe and Asia plus a few contributions from North America, the Middle East and Africa for a total of 20 countries. We would like to express our warmest gratitude to all the authors without whom organizing this event would have been impossible. Thanks to the outstanding work of the Program Committee and the additional reviewers, 20 full-sized papers and 5 additional short papers were finally accepted, which was not an easy task. Like MIPS 2003, MIPS 2004 remained a highly selective event with a 33% acceptance ratio including the short papers, which is the best warrant of a good program quality.
