Quest'opera è un prezioso strumento di formazione non soltanto per i project manager ma anche per tutti coloro che operano nell'edilizia: vengono infatti definiti i principi di integrazione fra le funzioni aziendali nell'ambito di un'organizzazione di progetto. Lo stesso progetto visto come parte del più ampio sistema aziendale. Si tratta quindi di un testo innovativo perché inquadra il project management nello schema concettuale dell'ingegneria economica: total cost management e nel contempo formativo perché chiarisce al lettore come applicare il project management in edilizia proponendo conoscenze e strumenti concettuali. Il volume che giunge ora alla seconda edizione debitamente aggiornata è arricchito da un caso reale di progetto che può essere utile per coloro che esercitano l'attività di controllo del progetto integrato nell'impresa di costruzione.

Integrated Evaluation for the Management of Contemporary Cities Giulio Mondini, Enrico Fattinanzi, Alessandra Oppio, Marta Bottero, Stefano Stanghellini, 2018-06-06. This book highlights a selection of the best papers presented at the 2016 SIEV conference. The Laudato s Encyclical Letter and Valuation Cities between Conflict and Solidarity Decay and Regeneration Exclusion and Participation which was held in Rome Italy in April 2016 and brought together experts from a diverse range of fields: economics, appraisal, architecture, energy, urban planning, sociology and the decision sciences and government representatives. The book is divided into four parts: Human Ecology, Values and Paradigms, Integral Ecology and Natural Resource Management, Intergenerational Equity and How to Enhance Dialogue and Transparency in Decision making Processes. Cities are where 72% of all Europeans live and this percentage is expected to rise to 80% by 2050. Given this trend towards urbanization, cities are continuously growing which also entails a growing risk of social segregation, lack of security and mounting environmental problems. All too often today's cities have to cope with social and environmental crises shifting the European urban agenda towards regeneration processes. Urban regeneration is more complex than merely renovating existing buildings as it also involves social and environmental problems, inhabitants' quality of life, protecting tangible and intangible cultural resources, innovation and business. *Sistemi intelligenti a supporto delle decisioni nelle banche e nelle assicurazioni* Ettore Bentsik, 1988.
