Integrating Business, Management and Organisation Scholarship Richard Breese, 2025-12-01 Businesses deliver value to their stakeholders including customers employees suppliers communities and shareholders Therefore value creation is pivotal to management theory but there is a lack of agreement amongst scholars about value at the conceptual level This book uses invariant properties of human activities to develop a novel theory of value to help resolve controversies and integrate scholarship from different specialisms To establish boundaries for the task of integration business management and organisation scholarship is identified as being an applied supra disciplinary mega field Its fragmented nature means that different academic fields such as strategic management and

marketing approach the concept of value in distinct ways based on their respective roots in economics and other social sciences Tracing the evolution of ideas on value over time a new theoretical framework is developed the integrating theory of value co creation as an alternative to existing theories on value creation for individuals and organisations The cornerstone of the integrating theory of value co creation is that exchange is the fundamental basis for value co creation which enables it to cover both provider and customer perspectives Given its interdisciplinary approach this book will appeal to any social scientist interested in the management of organisations **Monthly Catalog of United States Government Publications**,2004 The Federal Educational & Scholarship Funding Guide Grayco Publishing,1990
