Libraries in the Information Age Denise K. Fourie, Nancy E. Loe, 2016-05-23 The book *Library Media Connection* cited as something all librarians need to have on their shelves is now thoroughly revised for today's 21st century library environment. Covering both technology and library practices, the title has been a go-to text for librarians and library school students since 2002. Since the second edition of this must-have book was published in late 2009, libraries have undergone profound changes primarily linked to advances in technology. We've seen the debut of RDA, the release of new Pew Research library and Internet use data, and the establishment of digital repositories, community MakerSpaces, and community reads programs. Of course, libraries have also been affected by the expanding use of social media. This thoroughly updated title addresses all these changes and more, bringing you up to date on the monumental shifts impacting librarianship. The book is designed to introduce LIS students to the profession, preparing them to enter an exciting and evolving world. It clarifies the changing roles and responsibilities of library professionals, new paradigms for evaluating information, and characteristics and functions of today's library personnel. Among other subjects, chapters cover preparing materials for use, circulation, reference services, ethics in the information age, Internet trends, and job search basics. References, websites, and publications at the end of every chapter point to further resources, and appendices supply information such as policies, the library bill of rights, and the Freedom to Read statement.

The Death of the Artist William Deresiewicz, 2020-07-28 A deeply researched warning about how the digital economy threatens artists' lives and work, the music, writing, and visual art that sustain our souls and societies, from an award-winning essayist and critic. There are two stories you hear about earning a living as an artist in the digital age. One comes from Silicon Valley: There's never been a better time to be an artist; it goes, "If you've got a laptop, you've got a recording studio. If you've got an iPhone, you've got a movie camera. And if production is cheap, distribution is free; it's called the Internet. Everyone's an artist; just tap your creativity and put your stuff out there." The other comes from artists themselves: Sure, it goes, you can put your stuff out there, but who's going to pay you for it? Everyone is not an artist. Making art takes years of dedication and that requires a means of support. If things don't change, a lot of art will cease to be sustainable. So which account is true? Since people are still making a living as artists today, how are they managing to do it? William Deresiewicz, a leading critic of the arts and of contemporary culture, set out to answer those questions. Based on interviews with artists of all kinds, *The Death of the Artist* argues that we are in the midst of an epochal transformation. If artists were artisans in the Renaissance, bohemians in the nineteenth century, and professionals in the twentieth, a new paradigm is emerging in the digital age, one that is changing our fundamental ideas about the nature of art and the role of the artist in society.
