Social Issues in Living Color Arthur W. Blume, 2017-02-16 Offering fresh and exciting approaches to solving global problems this book creatively views challenging social issues through the lens of racial and ethnic psychology As the demographic makeup of the American population continues to evolve understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well being of society This three

volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology. It uniquely presents racial and ethnic psychological perspectives on topics such as media, criminal justice, racism, climate change, gender bias, and health and mental health disparities. Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race, ethnicity, gender, and sexual orientation. It also addresses how race and ethnicity affect communication styles, leadership styles, and media. The second volume discusses the experiences of individuals within racial and ethnic minorities, including overt racism, covert racism, and colonialism, and addresses how ethnic minority psychology plays a role in our educational system, poverty, global climate change, and sustainability. The third volume covers ethics in health and research, considers the causes of health and mental health disparities, and identifies diversity initiatives that can improve the health and well-being of all citizens, not just racial and ethnic minority citizens.

Black Girl Autopoetics Ashleigh Greene Wade, 2023-12-11. In *Black Girl Autopoetics*, Ashleigh Greene Wade explores how Black girls create representations of themselves in digital culture with the speed and flexibility enabled by smartphones. She analyzes the double bind Black girls face when creating content online: on one hand, their online activity makes them hypervisible, putting them at risk for cyberbullying, harassment, and other forms of violence; on the other hand, Black girls are rarely given credit for their digital inventiveness, rendering them invisible. Wade maps Black girls' everyday digital practices, showing what their digital content reveals about their everyday experiences and how their digital production contributes to a broader archive of Black life. She coins the term Black girl autopoetics to describe how Black girls self-making creatively reinvents cultural products, spaces, and discourse in digital space. Using ethnographic research into the digital cultural production of adolescent Black girls throughout the United States, Wade draws a complex picture of how Black girls navigate contemporary reality, urging us to listen to Black girls' experience and learn from their techniques of survival.

Chronicles of Care: A Design History of the COVID-19 Virus Paul A. Rodgers, Fernando Galdon, Craig Bremner, 2024-04-16. The COVID-19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care. The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive. Then they looked at all of this care and caring from the point of view of design, and by the sheer volume of design interventions they have documented, illustrate that design is good in a crisis. What the COVID-19 pandemic illustrated is that for the first time in modern history, capital was totally irrelevant. Money could not save your life. Only design could. Rapidly designed masks, shelters, hospitals, instructional posters, infographics, dashboards, respirators, sanitisers, virtual and local communities emerged to save us. From January 2020, design became king. The COVID-19 global pandemic presented an ontological reality: design is more than margins or profit. In fact, design became extremely valuable when it stopped concentrating on those things and started to care about people's lives. This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care. The contents of this book cover the outbreak.

lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others
