Smart Smart Home Handbook Adam Juniper, 2018-11-01 Until just a few years ago turning a light on and off with a clap was about as clever as technology got Today almost anything can be connected to the internet and with this connection comes the ability to turn your bedroom lights off from another country tell your thermostat to create a weather appropriate lighting scheme and answer the door without ever leaving your armchair This book introduces you to Alexa Siri and every major technology competing to smarten your home and improve your life You ll learn how to choose between them how to optimize their function and how to avoid the pitfalls that cause new adopters to wish they d never let a computer into their home

Mastering Apple HomePod Adidas Wilson , The new device HomePod offers an easy and amazing way for Apple users to enjoy AirPlay Apple Music and control their HomeKit devices from anywhere HomePod was not created to be a competitor to Google Home or Amazon Echo just as the MacBook Air was not designed to compete against the netbook Of course they do share a number of characteristics For instance the HomePod smart speaker can be voice controlled and the MacBook Air is compact and lightweight However HomePod is just a 350 home assistant much like the MacBook was a 200 laptop computer The Fire Phone by Amazon was not much of a hit Alexa therefore had to sell a lot so that Prime could stick into more people s lives This was a success thanks to the priced to move Echo Google on the other hand made a brilliant decision to follow in the footsteps because it has to satisfy its insatiable data thirst When it comes to HomePod something was a little different The AirPod was designed to help you enjoy your favorite music on the go while HomePod was designed to help you enjoy your favorite music in a convenient way in your home AirPods lacked wires and sufficient surface area for traditional buttons Because of this the Siri voice control was the only way to interact with the gadget you have to be near the device
