Lisi,Stefano Cagnoni,2023-11-29 Artificial Intelligence AI including Machine Learning with Deep Neural Networks is making and supporting decisions in ways that increasingly affect humans in many aspects of their lives Both autonomous and decision support systems applying AI algorithms and data driven models are used for decisions about justice education physical and psychological health and to provide or deny access to credit healthcare and other essential resources in all aspects of daily life in increasingly ubiquitous and sometimes ambiguous ways Too often these systems are built without considering the human factors associated with their use and the need for clarity about the correct way to use them and possible biases Models and systems provide results that are difficult to interpret and are accused of being good or bad whereas good or bad is only the design of such tools and the necessary training for them to be properly integrated into human values

 Teresa Schenk, 2017-06-12 Lesson Plan from the year 2017 in the subject Didactics for the subject English Pedagogy
 Literature Studies grade 1 7 University of Augsburg language English abstract The lesson described in this paper is based on
 the book The Hobbit by J R R Tolkien The lesson is intended for a year 10 class in a grammar school the recipients of the
 lesson will therefore be 14 to 17 year old pupils The fantasy novel The Hobbit was chosen for several reasons The book was
 originally written for children which means that it contains relatively easy vocabulary and is fun to read at the same time
 Pupils are likely to enjoy this book as it is set in a fictional world that is lovingly described and is packed with action as the
 protagonists have to survive many exciting adventures Furthermore J R R Tolkien is listed in the syllabus for Realschulen as
 an author that could be discussed in year 10 As the pupils at grammar school are the same age should have similar
 competences and most likely have similar interests as pupils in a Realschule the book should be appropriate for grammar
 school pupils too The lesson described in this paper would be the first of about eight lessons on the book and would be 45
 minutes long The main focus of the lesson is set on reading comprehension and so the overall goal of the lesson is for the
 pupils to be capable of summarising the first two chapters of The Hobbit in their own words as well as being able to reflect
 on the novel This goal is based on the syllabus for English in grammar schools in year 10 The aims of reading comprehension
 that should be attained by the end of year 10 are described here Among other things Pupils should be able to read long and
 complicated literary texts and understand them on their own This is expected of the pupils in the lesson on The Hobbit as the
 homework due for the lesson is to read the first two chapters of The Hobbit on their own In the section on understanding
 texts there is a passage stating that pupils in year 10 should read either a novel or a drama of the twentieth or twenty first
 century and understand interpret and give their own opinion on the text ISB 2004 The novel The Hobbit fits into the category
 of novels from the twentieth century as it was published in 1937 Tolkien 1997 and in the course of the lesson will be
 understanding interpreting and giving their own opinion on the text *Resources in Education* ,1997 *CA Rdg*
