Love in the AI Age beckons you to ruminate upon the limitless prospects and tribulations that lie ahead in this intrepid new world. *Alien AI's Marine* Mina Carter, 2021. He's the lone human male in a sea of lethal alien warriors. He's either gifted or suicidal. Kidnapped by aliens, rescued, and now on a secret base in a system he can't even pronounce. Major Jay Stephens has given up on a wing and a prayer; he's now on kicking butt and taking names. Especially when it comes to the alien AI who's risked everything, even her life, to protect him. The only problem she's gone and gotten herself a body. Beautiful and delicate, she evokes reactions in him that should be illegal. The REAL problem: An AI in physical form is totally illegal and against just about every law in Latharian society. Which means lots of lethal aliens want to kill it, and by extension, his AI. And that's going to be a problem. Because Jay thinks no, he knows he's in love with her, and no little large green totally not green men are going to draanth up the best thing he ever had. She never wanted a body. Until she met her human marine. One of the most advanced AI's in the empire, Keris is used to being so much more than any biological could dream of. She never expected that saving a lone human would lead to her taking physical form. But a new form comes with a whole host of new problems. She's gone from being able to run a ship single-handed to struggling to coordinate her own two legs. And when Jay is around, her new brain quits functioning. All she can think about is the handsome human and what his lips would feel like on hers. But when the chips are down and Jay is taken from her, she'll show them that any woman scorned is a dangerous thing. AI or not. *The Machine's Heart* Morgan B. Blake, 2024-12-18.
