Funk,2008-11-30 Web 2.0 has taken on buzzword status. It's now shorthand for everything that is new, cutting edge and gaining momentum online. Web 2.0 can describe particular Web sites, cultural trends like social networking, blogging or podcasting or the underlying technology that makes today's coolest Web applications possible. Many Web 2.0 innovations were pioneered by behemoths like Google, Amazon, Apple, YouTube and MySpace. But even the smallest, leanest companies can take advantage of the new trends, new and open source programming tools and new networks. This book presents a wealth of ideas that will enable any business to quickly and affordably deploy Web 2.0 best practices to gain customers and maximize profits. Web 2.0 is more a series of trends than a basket of things. More and more power is in the hands of individual users and their networks. Web content is distributed, sorted, combined and displayed across the Web in formats and places not anticipated by the content creators. New technology now makes rich online experiences and complex software applications possible and at a low cost. Integration is breaking down walls between PCs and mobile devices. Web 2.0 is a landscape in which users control their online experience and influence the experiences of others. Business success on the Web therefore now comes from harnessing the power of social networks, computing networks, media and opinion networks and advertising networks. Web 2.0 takes advantage of higher bandwidth and lighter weight programming tools to create rich, engaging online experiences that compete with television and other offline activities. With examples and case studies from real businesses, this book demonstrates what makes a successful Web 2.0 company regardless of its size or resources. A non-technical guide, it is aimed squarely at the marketer or business manager who wants to understand recent developments in the online world and to turn them into practical competitive advantages.

Examine how the contemporary function of museums has affected the types of positions available and the work museum staff do on a daily basis.
