Cheung, Fu Lee Wang, Naraphorn Paoprasert, Peerayuth Charnsethikul, Kam Cheong Li, Kongkiti Phusavat, 2023-11-08 This book constitutes the refereed proceedings of the 6th International Conference on Technology in Education Innovations for Online Teaching and Learning ICTE 2023 held in Hong Kong China during December 19-21, 2023. The 30 full papers included in this book were carefully reviewed and selected from 74 submissions. They were organized in topical sections as follows: keynote papers; online and innovative learning; personalized and individualized learning; smart learning environment; artificial intelligence in education; and institutional strategies and practices. Open Dialogue Around the World - Implementation, Outcomes, Experiences, and Perspectives David Mosse, Raffaella Pocobello, Rob Saunders, Jaakko Seikkula, Sebastian von Peter, 2025-07-30 Open Dialogue (OD) is a low hierarchical mental health service model that originated in Finland in the 1980s following a change on two different levels. First, a culture of dialogical communication between staff, users, and caregivers was established. Secondly, community-based multi-disciplinary teams were organized to offer primarily outpatient services. Immediate help in crisis, continuity of support by the same team, a low medication and primarily psychotherapeutically oriented approach are key principles of OD that have been further elaborated upon overtime during the past decades. OD promotes mutual trust and open exchange between the involved stakeholders. It is based on a mental health care epistemology that prioritizes human values, everyday relationships, and context-bound understandings over symptoms and clinical diagnostics. Transparency is of high value. All information is shared, and all voices are to be heard, thereby recognizing diversity and reflecting power differentials during the whole process of support. OD is now practiced in various regions around the globe, i.e., in several countries in Europe as well as in Australia, Japan, Latin America, and the USA. Studies in Western Lapland demonstrated various outcomes such as reducing the prevalence and incidence of so-called chronic mental illness, need for disability benefits, and intake of neuroleptic medication while increasing functional remission and taking up work on the first labour market. However, these outcomes primarily originate in studies that have investigated the OD in countries of its origin, leading to the question of whether they are transferrable to other healthcare contexts. This question is crucial since OD varies internationally in its adaption to local health care systems and contingencies instead of representing a clearly demarcated intervention. This Research Topic is interested in gaining an international perspective on OD. It will assemble papers and contributions that report and comment on local OD practices, describe and analyze their outcomes and impact, and inform future directions worldwide. Manuscripts that are co-authored by peers, survivors, and user researchers are especially welcomed. All manuscripts will be peer-reviewed. We are interested in qualitative, quantitative, and mixed method original research on OD, reporting on empirical research such as the results of intervention studies, clinical or pilot trials, systematic reviews or mini reviews that summarize the results of empirical studies on OD, case reports that highlight an unexpected situation or outcome of an OD course of support, policy and practice reviews on local regulations, and

guidelines that are relevant for OD Hypotheses papers that present novel arguments interpretations or theoretical models in relation to OD Perspective articles that present a viewpoint on a specific area of investigation in relation to OD Conceptual analysis articles that explore the concepts and issues behind OD Papers on training and instructions that describe innovative curricula courses and teaching formats concerning OD Data report presenting a description or a research dataset on OD Brief research report that presents original research and or preliminary findings on OD with fewer detail Commentary and opinion papers that provide critical comments or contribute viewpoints on recent research findings

Humrich, Tamas Nemeth, Kyle T. Amber, Reza Akbarzadeh, 2025-07-29 Innate immunity is essential in host protection against infections tumors and tissue injury that generates inflammatory responses and mediates the recruitment of immune cells as well as the production of pro and anti inflammatory mediators during the initiation of an immune response However compelling evidence indicates that innate immunity applies mechanisms beyond a simple first line defense against pathogens as it faces a diverse range of invading pathogens provides complex crosstalk with adaptive immunity and its aberrant regulation is associated with diverse pathologies Initiation activation and resolution of the innate inflammatory reactions should be tightly regulated to provide effective elimination of pathogens and maintenance of tissue homeostasis but also avoid overreacting inflammatory responses Dysregulated innate immune reactions typically cause autoinflammatory diseases but also contribute to chronic inflammation and autoimmune diseases such as systemic lupus erythematosus rheumatoid arthritis multiple sclerosis or inflammatory bowel disease

Although autoimmunity is defined by a loss of self tolerance typically caused by dysregulation of the adaptive immune system innate immunity exerts a key role in the initiation progression and perpetuation of chronic inflammation and autoimmunity
