Natural Language Processing with Python Quantum Technologies LLC, 2025-01-16 Learn NLP with Python through practical exercises advanced topics like transformers and real world projects such as chatbots and dashboards A comprehensive guide for mastering NLP techniques Key Features A comprehensive guide to processing analyzing and modeling human language with Python Real world projects that reinforce NLP concepts including chatbot design and sentiment analysis Foundational and advanced NLP techniques for practical applications in diverse domains Book Description Embark on a comprehensive journey to master natural language processing NLP with Python Begin with foundational concepts like text preprocessing tokenization and key Python libraries such as NLTK spaCy and TextBlob Explore the challenges of text data and gain hands on experience in cleaning tokenizing and building basic NLP pipelines Early chapters provide practical exercises to solidify your understanding of essential techniques Advance to sophisticated topics like feature engineering using Bag of Words TF IDF and embeddings like Word2Vec and BERT Delve into language modeling with RNNs syntax parsing and sentiment analysis learning to apply these techniques in real world scenarios Chapters on topic modeling and text summarization equip you to extract insights from data while transformer based models like BERT take your skills to the next level Each concept is paired with Python based examples ensuring practical mastery The final chapters focus on real world projects such as developing chatbots sentiment analysis dashboards and news aggregators These hands on applications challenge you to design train and deploy robust NLP solutions With its structured approach and practical focus this book equips you to confidently tackle real world NLP challenges and innovate in the field What you will learn Clean and preprocess text data using Python effectively Master tokenization techniques for words sentences and characters Build robust NLP pipelines with feature engineering methods Implement sentiment analysis with machine learning models Perform topic modeling using LDA LSA and other algorithms Develop chatbots and dashboards for real world applications Who this book is for This book is ideal for students researchers and professionals in machine learning data science and artificial intelligence who want to master NLP Beginners will benefit from the step by step introduction to text processing and feature engineering while experienced practitioners can explore advanced topics like transformers and real world projects Basic knowledge of Python and familiarity with programming concepts are recommended to fully utilize the content Enthusiasts with a passion for language technology will also find this guide valuable for building practical NLP applications

Media Literacy in Action Renee Hobbs, 2024-10-14 There s never been a more important time for students to develop media literacy competencies When students ask critical questions about the media they consume they develop fundamental knowledge and critical thinking skills that prepare them for life work and meaningful citizenship Media Literacy in Action addresses learners who are simultaneously active as both creators and consumers of media messages At the same time the book recognizes that everyone is vulnerable to media influence because of our dependence on the instant

gratification and feelings of connectedness that digital platforms provide To thrive in a media saturated society people need to ask critical questions about what we watch see listen to read and use This book gives students those tools Key features of the second edition Critical examination of AI technologies algorithmic personalization data privacy and surveillance and the increased global regulation of digital platforms Attention to media literacy for empowerment and protection Inquiry oriented approach to learning that cultivates intellectual curiosity and creative expression Full color presentation with figures and photos to increase student engagement Each chapter includes Media Literacy Trailblazers Profiles of key thinkers and their theories connect students with the discipline of media literacy Media Literacy DISCourse NEW Visual representations of media literacy theoretical principles help learners internalize the practice of asking critical questions as they respond to specific media examples Learning in Action NEW Summary and vocabulary sections combine with Analyze Create Reflect and Act activities to empower students to apply ideas from each chapter Supplemental Materials available at www.mlaction.com Students can review key ideas learn about more Media Literacy Trailblazers and watch videos aligned with each chapter Instructors can access a Teacher s Guide of best practices in class activities homework and projects Also available are chapter summaries lecture slides YouTube playlists and test materials

Integrating AI and Machine Learning into Business and Management Education R., Manjunath B., R., Sunil Kumar, 2025-07-30 The integration of AI and machine Learning into business education has developed a more efficient way of training future leaders These technologies enhance the curriculum design and equip students with critical and analytical decision skills for today s fast paced business environment AI and machine learning tools foster experiential learning and bridge the gap between theory and practice As industries increasingly rely on automation and predictive analytics embedding these technologies into business education is not just innovative it is imperative for preparing agile tech savvy professionals capable of navigating complex organizational challenges Integrating AI and Machine Learning into Business and Management Education explores how the transformative capabilities of AI and machine learning can be effectively integrated into management education This book encourages the adoption of AI for personalized learning and advanced problem solving in management training Covering topics such as education AI and management this book is an excellent resource for academicians researchers corporate trainers graduates and policymakers

Data Science Solutions on Azure Julian Soh, Priyanshi Singh, 2024-11-18 This revamped and updated book focuses on the latest in AI technology Generative AI It builds on the first edition by moving away from traditional data science into the area of applied AI using the latest breakthroughs in Generative AI Based on real world projects this edition takes a deep look into new concepts and approaches such as Prompt Engineering testing and grounding of Large Language Models fine tuning and implementing new solution architectures such as Retrieval Augmented Generation RAG You will learn about new embedded AI technologies in Search such as Semantic and Vector Search Written with a view on how to implement Generative AI in software this book contains examples and sample code In addition to traditional Data Science

experimentation in Azure Machine Learning AML that was covered in the first edition the authors cover new tools such as Azure AI Studio specifically for testing and experimentation with Generative AI models

What's New in this Book Provides new concepts tools and technologies such as Large and Small Language Models Semantic Kernel and Automatic Function Calling Takes a deeper dive into using Azure AI Studio for RAG and Prompt Engineering design Includes new and updated case studies for Azure OpenAI Teaches about Copilots plugins and agents What You'll Learn Get up to date on the important technical aspects of Large Language Models based on Azure OpenAI as the reference platform Know about the different types of models GPT3 5 Turbo GPT4 GPT4o Codex DALL E and Small Language Models such as Phi 3 Develop new skills such as Prompt Engineering and fine tuning of Large Small Language Models Understand and implement new architectures such as RAG and Automatic Function Calling Understand approaches for implementing Generative AI using LangChain and Semantic Kernel See how real world projects help you identify great candidates for Applied AI projects including Large Small Language Models

Who This Book Is For Software engineers and architects looking to deploy end to end Generative AI solutions on Azure with the latest tools and techniques

Artificial Intelligence in Medicine Riccardo Bellazzi, José Manuel Juárez Herrero, Lucia Sacchi, Blaž Zupan, 2025-06-22 This book constitutes the refereed proceedings of the 23rd International Conference on Artificial Intelligence in Medicine AIME 2025 which took place in Pavia Italy during June 23 26 2025 The 49 full papers and 81 short papers included in the proceedings were carefully reviewed and selected from 311 submissions They deal with the development of theory methods systems and applications of AI in biomedicine including the application of AI approaches in biomedical informatics healthcare organization and molecular medicine

Explainable AI (XAI) for Sustainable Development Lakshmi D, Ravi Shekhar Tiwari, Rajesh Kumar Dhanaraj, Seifedine Kadry, 2024-06-26 This book presents innovative research works to automate innovate design and deploy AI for real world applications It discusses AI applications in major cutting edge technologies and details about deployment solutions for different applications for sustainable development The application of Blockchain techniques illustrates the ways of optimisation algorithms in this book The challenges associated with AI deployment are also discussed in detail and edge computing with machine learning solutions is explained This book provides multi domain applications of AI to the readers to help find innovative methods towards the business sustainability and customer outreach paradigms in the AI domain Focuses on virtual machine placement and migration techniques for cloud data centres Presents the role of machine learning and meta heuristic approaches for optimisation in cloud computing services Includes application of placement techniques for quality of service performance and reliability improvement Explores data centre resource management load balancing and orchestration using machine learning techniques Analyses dynamic and scalable resource scheduling with a focus on resource management The reference work is for postgraduate students professionals and academic researchers in computer science and information technology

Technology Brands in the Digital Economy Wioleta Kucharska, Ewa Lechman, 2023-03-10 This edited

volume provides deep insight into theoretical and empirical evidence on how digital technologies and high tech brands are interrelated. It traces the mutual links between these two phenomena, identifies the multidimensionality of interdependencies, and shows the reader how and why new technologies are the driving factors of creation and global dissemination of high tech brands. In this context, it also refers to various types of economic and social networks that on the one hand are the products of digital technologies while on the other enforce global visibility of high tech brands. The book contributes to the present state of knowledge, offering the reader broad evidence on how digital technologies impact the process of high tech brands' nascence and how their growing role and global exposure influence networked economies and societies. It sets out to deliver a bridge between brand management and economical approaches to understanding how digital technologies and high tech brands are interrelated. This multidisciplinary approach creates a complex compilation of different views and perspectives that sheds new light on the high tech brands' phenomena of being an input and output of technology-driven economies. *Technology Brands in the Digital Economy* is written for scholars and researchers from a wide variety of disciplines but especially for those addressing issues of brands and economic development and growth, social development, and the role of technological progress in broadly defined socio-economic progress. It will also be an invaluable source of knowledge for graduate and postgraduate students in a variety of areas such as economic and social development, information and technology, worldwide studies, social policy, and comparative economics.

Kodawari: Japanische Exzellenz - Kultur und Menschlichkeit als Wettbewerbsvorteil Michael Okada, 2025-08-12. Dieses Buch ist kein Ratgeber, keine Methode, kein 10-Schritte-Plan. Es ist ein Aufruf, anders zu denken, tiefer menschlicher, mutiger und vielleicht auch ein wenig japanischer. Kodawari steht für das Streben nach Exzellenz, den Mut, nicht effizienter, sondern besser zu sein. Es ist eine Neuausrichtung auf das, was wirklich zählt und definiert neue Ansätze für eine Wirtschaft, die mehr ist als reine Zahlen und effiziente Arbeiten. Sie bedeutsamer, nicht schneller und effizienter, sondern Sie produzieren Sie besser, nicht mehr, und Sie seien Sie unverwechselbar, nicht lauter. Der Deutsch-Japaner Michael Okada, aufgewachsen zwischen Direktheit und Demut, Tempo und Tiefe, zeigt eine einzigartige Perspektive. Eine, die die Wirtschaft menschlicher und bedeutsamer denkt. Ein Buch für alle, die bereit

sind die Perspektive zu wechseln und das Augenmerk hinliche zu leben

Advances in Automotive Production Technology - Theory and

Application Philipp Weißgraeber, Frieder Heieck, Clemens Ackermann, 2021-06-01 This volume of the series ARENA2036 compiles the outcomes of the first Stuttgart Conference on Automotive Production SCAP2020. It contains peer reviewed contributions from a theoretical as well as practical vantage point and is topically structured according to the following four sections: I Novel Approaches for Efficient Production and Assembly Planning II Smart Production Systems and Data Services III Advances in Manufacturing Processes and Materials and IV New Concepts for Autonomous Collaborative Intralogistics. Given the restrictive circumstances of 2020 the conference was held as a fully digital event divided into two parts. It opened with a pre week allowing everyone to peruse the scientific contributions at their own pace followed by a two day live event that enabled experts from the sciences and the industry to engage in various discussions. The conference has proven itself as an insightful forum that allowed for an expertly exchange regarding the pivotal Advances in Automotive Production and Technology.

Ethics in the Digital Domain Robert S. Fortner, 2025-09-04 Fortner's introduction to media ethics challenges students to confront the impact of the digital world on their lives. Ethics in the Digital Domain addresses the principal ethical issues created or enhanced by life increasingly conducted in digital environments. Chapters discuss social media, the construction and maintenance of identity, the incursion of robots into the workplace and their replacement of work, the increasing reliance on artificial intelligence and the likely future of its implementation, the arrival of alternative realities such as virtual and augmented reality even reality after death. Fortner explores what constitutes truth in what many consider a post truth world and the implications of our new digital age for the maintenance and conduct of democracy. This book raises significant questions about how the digital age may change our conception of our selves, our friendships and marriage opportunities, our conception of the value and concept of work and career along with the necessity of navigating through both physical and digital or artificial life quickly becoming dominant in the human experience. The second edition includes expanded treatments of truth, politics, identity, construction and maintenance and social change resulting from our increasing existence within digital realities. It includes new chapters on the consequences of incorporating robots into everyday life and both virtual and augmented realities, realities for human flourishing. It asks the question of what human means in this new set of environments and whether people's understanding of their own humanity or that of others will change as technology advances. Features include a glossary of keywords highlighted throughout the text, case studies in each chapter that allow students to debate significant ethical issues in the digital age, discussion questions at the end of each chapter to further explore the issues raised in each chapter and figures that illustrate the realities of this digital age.
