The Psychology of Cybersecurity Tarnveer Singh, Sarah Y. Zheng, 2025-08-29 This book takes a fresh look at the underappreciated role of human psychology in cybersecurity and information technology management. It discusses the latest insights from practice and scholarly work on the role of cognitive bias and human factors in critical decisions that could affect the lives of many people. Written by an experienced chief information security officer (CISO) and an academic with over two decades of lived experience dealing with cybersecurity risks, this book considers the psychological drivers and pitfalls of the four key personas in cybersecurity: from hackers and defenders to targeted individuals and organisational leaders. It bridges state-of-the-art research findings with real-world examples and case studies to show how understanding the psychological factors in cybersecurity can help people protect themselves and their organisations better. Full of advice on security best practices that consider the human element of cybersecurity, this book will be of great interest to professionals and managers in the cybersecurity domain, information technology and governance, and risk management. Digital entrepreneurship is driven by the rapid evolution of information and communication technologies (ICTs), which have redefined how businesses operate, interact with customers, and compete in the global marketplace.
