Mastering Data Engineering and Analytics with Databricks Manoj Kumar, 2024-09-30

TAGLINE Master Databricks to Transform Data into Strategic Insights for Tomorrow's Business Challenges

KEY FEATURES Combines theory with practical steps to master Databricks Delta Lake and MLflow Real world examples from FMCG and CPG sectors demonstrate Databricks in action Covers real time data processing ML integration and CI CD for scalable pipelines Offers proven strategies to optimize workflows and avoid common pitfalls

DESCRIPTION In today's data driven world mastering data engineering is crucial for driving innovation and delivering real business impact Databricks is one of the most powerful platforms which unifies data analytics and AI requirements of numerous organizations worldwide Mastering Data Engineering and Analytics with Databricks goes beyond the basics offering a hands on practical approach tailored for professionals eager to excel in the evolving landscape of data engineering and analytics This book uniquely blends foundational knowledge with advanced applications equipping readers with the expertise to build optimize and scale data pipelines that meet real world business needs With a focus on actionable learning it delves into complex workflows including real time data processing advanced optimization with Delta Lake and seamless ML integration with MLflow skills critical for today's data professionals Drawing from real world case studies in FMCG and CPG industries this book not only teaches you how to implement Databricks solutions but also provides strategic insights into tackling industry specific challenges From setting up your environment to deploying CI CD pipelines you'll gain a competitive edge by mastering techniques that are directly applicable to your organization's data strategy By the end you'll not just understand Databricks you'll command it positioning yourself as a leader in the data engineering space

WHAT WILL YOU LEARN Design and implement scalable high performance data pipelines using Databricks for various business use cases Optimize query performance and efficiently manage cloud resources for cost effective data processing Seamlessly integrate machine learning models into your data engineering workflows for smarter automation Build and deploy real time data processing solutions for timely and actionable insights Develop reliable and fault tolerant Delta Lake architectures to support efficient data lakes at scale

WHO IS THIS BOOK FOR This book is designed for data engineering students aspiring data engineers experienced data professionals cloud data architects data scientists and analysts looking to expand their skill sets as well as IT managers seeking to master data engineering and analytics with Databricks A basic understanding of data engineering concepts familiarity with data analytics and some experience with cloud computing or programming languages such as Python or SQL will help readers fully benefit

from the book's content
TABLE OF CONTENTS
SECTION 1
1 Introducing Data Engineering with Databricks
2 Setting Up a Databricks Environment for Data Engineering
3 Working with Databricks Utilities and Clusters
SECTION 2
4 Extracting and Loading Data Using Databricks
5 Transforming Data with Databricks
6 Handling Streaming Data with Databricks
7 Creating Delta Live Tables
8 Data Partitioning and Shuffling
9 Performance Tuning and Best Practices
10 Workflow Management
11 Databricks SQL Warehouse
12 Data Storage and Unity Catalog
13 Monitoring Databricks Clusters and Jobs
14 Production Deployment Strategies
15 Maintaining Data Pipelines in Production

AI in Wonderland Samir Khan,2025-01-14 This report explores the move from traditional industry practices to emerging technologies specifically the integration of artificial intelligence AI solutions in engineering service sectors It highlights the increasing problem of technology washing when organizations overstate sometimes deceptively their technology abilities and ethics posing challenges to accountability transparency and trust in various fields The rise of AI based solutions in sectors like autonomous mobility manufacturing and aerospace has exposed a contrast between ambitious future aspirations and current technological barriers With this the role of human knowledge in guaranteeing ethical efficient and clear technology incorporation becomes essential Starting with an examination of today s

technological scene this report tackles topics such as the buzz around autonomous systems and the difficulties of standardizing fresh innovations It also points out the problem of organizations exaggerating the capabilities of AI stressing the importance of human monitoring to manage operational risks and uphold public trust Practical scenarios in autonomous mobility aerospace and manufacturing highlight a significant discrepancy between industry targets and technological feasibilities stressing the indispensable contribution of human intervention in ensuring successful implementation These examples are analyzed to give insights into current technology successes and limitations and to propose a balanced path for the future Ultimately there may be a future where groundbreaking technological advancements remain in harmony with human values This report challenges established narratives and outlines a path for ethical technological advancement that is transparent and in line with societal values examining questions like the following What are some popular misunderstandings and exaggerated claims regarding AI capabilities today Examine the divide between how the public sees things and what s actually true in the context of deceptive AI practices and inflated statements How do organizations maintain a balance between rapid technological adoption and human oversight Explore ways to maintain human knowledge in decision making processes despite technological advances What are stakeholders views on the reliability and safety of autonomous technologies Investigate the certainty levels in crucial systems that have implications for public safety and business continuity What are the risks associated with overusing AI for critical functions Highlight the potential pitfalls of excessive reliance on AI without proper backup systems or redundancy plans NOTE SAE Edge Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of interest to the mobility industry The goal of SAE Edge Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues These reports are not intended to resolve the challenges they identify or close any topic to further scrutiny ISBN 9781468609233 ISBN 9781468609240 <https://doi.org/10.4271/EPR2025002>

Getting Skills Right Training Supply for the Green and AI Transitions Equipping Workers with the Right Skills OECD,2024-12-11 Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence AI in the workplace While initial education is important upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions Policy makers face the challenge of ensuring training is both relevant and inclusive yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs Most research focuses on the demand for skills with little insight into the supply To fill this gap this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective inclusive training strategies
