generating Monthly Recurring Revenue MRR through automated YouTube content creation or management without revealing the creator's identity or showing their face on the platform. This could involve various strategies such as Automated Content Creation Using software or algorithms to generate and upload videos automatically based on certain criteria like trending topics, keywords, or specific niches. Content Curation Curating existing videos from other creators or sources and compiling them into thematic playlists or channels. Monetization Strategies Implementing various monetization methods such as ads, sponsorships, affiliate marketing, or selling digital products/services related to the content niche. SEO and Marketing Automation Leveraging automation tools for search engine optimization, SEO, social media marketing, and audience engagement to drive traffic and increase visibility. Outsourcing and Delegation Hiring freelancers or virtual assistants to handle different aspects of content creation, management, and promotion. The term "faceless" suggests that the creator prefers to remain anonymous or undisclosed, possibly to avoid personal branding or to maintain privacy. This approach allows focusing solely on the content and its profitability without associating it with a specific individual. MRR or Monthly Recurring Revenue is a key metric for subscription-based businesses, indicating the predictable revenue generated from subscriptions or recurring payments on a monthly basis. In the context of YouTube, it could refer to the consistent revenue generated from ad monetization, memberships, or other recurring sources. Combining automation with YouTube content creation can streamline processes, scale operations, and potentially generate passive income over time. However, it's essential to adhere to YouTube's policies and guidelines to ensure compliance and avoid penalties such as demonetization or account suspension.

How video transformed policing and security. Video cameras are everywhere, attached to buildings, drones, and dashboards embedded in smartphones, laptops, and doorbells worn on police uniforms and sunglasses. In *Targeted*, Kelly Gates argues that the resulting avalanche of video has transformed the landscape of policing and security in the twenty-first century. Video production, analysis, and archival management are now central to the ways police power is exercised, criminal law enforced, and spaces of human habitation securitized. Gates examines the primacy of video in four key areas of policing and security: the field of digital multimedia forensics, private video surveillance, infrastructure development, police body-worn camera systems, and video analytics for automated surveillance. Video AI. Case studies of two companies illustrate the role of corporations in these far-reaching media technological changes. Target Corporation has integrated its retail security operations with law enforcement.

expanding its surveillance beyond its stores and parking lots and into the criminal legal system Axon Enterprise is leveraging the growing volume of police body cam video to build a large scale proprietary platform for policing Targeted reveals the role of video infrastructure development in the increasingly entangled relationship between the modern police and the modern corporation in the long wake and ruins of neoliberalism Fast Forward Investing: How to Profit from AI, Driverless Vehicles, Gene Editing, Robotics, and Other Technologies Reshaping Our Lives Jon Markman, 2018-11-02 Invest in the future Everything you need to capitalize on the tech revolution Our lives are on the verge of being reshaped by advanced technology Fast Forward Investing provides the knowledge and insight you need to build and maintain your portfolio accordingly Author Jon D Markman is a veteran tech investor money manager and award winning author of the popular daily newsletter Tech Trend Trader There s no one more qualified to help you design a portfolio that extracts huge profits from the shares of public technology companies and helps you augment your gains with conviction during stretches of high volatility In Fast Forward Investing Markman describes what to expect when to expect it and how to profit in impending technological and economic revolution Revealing the most important companies in the industry that are right now building platforms and competitive advantages that will disrupt and transform their markets he shows which trends are important and provides detailed guidance for staying ahead of the curve Radical advances in data collection and analytics artificial intelligence and raw computing power are changing human history And it s happening with sharp advances at incredible speed Make sure you re at the tip of the spear with Fast Forward Investing **Using Information Technology** Stacey C.
