Never to Return: Brighton College's Fallen 1914-18 Max Usher, 2017-01-12 In the early summer of 1914 the headmaster of Brighton College Canon W R Dawson spoke to the school in chapel He called on every boy present to stand ready to sacrifice his life in defence of his country No shot had yet been fired in anger Austria's Archduke still lived few anticipated a European war and yet Brighton's headmaster seemed to sense the approaching clouds of conflict There were probably 280 boys in the Chapel that day By November 1918 many of them were dead some of the total of 149 Old Boys killed in the Great War Ten of them were still teenagers This book presents mini biographies of the School's former students killed in the First World War and serves as a fitting tribute to their bravery and fortitude *A University Education* David Willetts, 2017 In *A University Education* David Willetts draws on his experience as Minister for Universities and Science from 2010 to 2014 as well as a broad spectrum of research and international comparisons to offer a powerful defence of the value of higher education in the world today If you want to read one book about our universities today then this is it Never one to shirk controversy either as a Minister or an author Mr Willetts combines a passionate advocacy of the value of a university education with a serious in depth knowledge of the higher education sector to present his vision of what our universities can offer us both now and in the future *Shaping the Future of Work* Thomas Kochan, Lee Dyer, 2020-11-24 This book provides a clear roadmap for the roles workers and leaders in business labor education and government must play in building a new social contract for all to prosper It is a call to action for a collaborative effort to develop both high quality jobs and strong successful businesses while simultaneously overcoming the deep social and economic divisions that are all too apparent in society today Written by two leading and trusted experts in the field of employment and work from MIT and Cornell University this book is a practical action oriented guide Readers will feel empowered to take actions needed to shape a better future of work for themselves their employees their co workers and others they may represent It emphasizes the need to fix America's broken social contract and reimagine a new one The most important message of this book is that we have the ability to shape the work of the future by harnessing the power of new technologies The book is essential reading for business executives labor leaders and workforce advocates government policy makers politicians and anyone who is interested in using emerging knowledge and technologies to drive innovation creating high quality jobs and shaping a more broadly shared prosperity **World University Rankings: Statistical Issues And Possible Remedies** Kay Cheng Soh, 2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum

to process the indicator data Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy
