Meaning And Textuality:

Meaning and Textuality François Rastier, Frank Collins, Paul Perron, 1997 Rastier proposes a theoretical framework for the semantic description and typology of texts establishing a critical debate among various streams of research before arriving at a synthesis of literary semiotics, thematics and linguistic semantics

Meaning and Reading Michel Meyer, 1983-01-01 According to the traditional view, meaning presents itself under the form of some kind of identity. To give the meaning of a sentence amounts to being capable of producing some substitute based on the identity of the terms of the sentence. Is then the meaning of a book or of any text the capacity of rewriting it. Instead of retaining a double standard theory of meaning, one for sentences and another for texts that would allow for an ad hoc gap, the author provides a unified conception called the question view of language he has developed, known as problematology. He pursues a systematic analysis of questioning in literature and shows how questioning makes the understanding process possible

The Dictionary of Human Geography Derek Gregory, Ron Johnston, Geraldine Pratt, Michael Watts, Sarah Whatmore, 2011-09-23 THE DICTIONARY OF HUMAN GEOGRAPHY Even better than before, the Dictionary is an essential tool for all human geographers and over the years has provided an invaluable guide to the changing boundaries and content of the discipline. No one can afford to be without this fifth edition. Linda McDowell, University of Oxford. From explanations of core concepts and central debates to lucid discussions of the theories driving contemporary research, this is the best conceptual map to the creative and critical thinking that characterises contemporary human geography. The fifth edition belongs on the bookshelf of all serious students. Gerard Toal, Virginia Tech. With an exceptional balance between breadth and depth, this is undoubtedly a timely and ground-breaking revision of the Dictionary. An outstanding accomplishment of the editors and contributors and a comprehensive and essential reference for any student or scholar interested in human geography. Mei Po Kwan, Ohio State University. I can't imagine life without it. Definitive, detailed yet accessible, there's still no single volume reference work in the field to rival it. Noel Castree, University of Manchester. The Dictionary of Human Geography represents the definitive guide to issues and ideas, methods and theories in human geography. Now in its fifth edition, this ground-breaking text has been comprehensively revised to reflect the changing nature and practice of human geography and its rapidly developing connections with other fields. The major entries not only describe the development of concepts, contributions and debates in human geography but also advance them. Shorter definitional entries allow quick reference and coverage of the wider subject area. Changes to the fifth edition include entries from many new contributors at the forefront of developments in the field and over 300 key terms appearing for the first time. It features a new consolidated bibliography along with a detailed index and systematic cross-referencing of headwords. The Dictionary of Human Geography continues to be the one guidebook no student, instructor or researcher in the field can afford to be without

The Event of Meaning in Gadamer's Hermeneutics Carlo DaVia, Greg Lynch, 2024-02-06 This book presents the first detailed treatment of Gadamer's account of

the nature of meaning It argues both that this account is philosophically valuable in its own right and that understanding it sheds new light on his wider hermeneutical project Whereas philosophers have typically thought of meanings as belonging to a special class of objects the central claim of Gadamer's view is that meanings are events Instead of a pre-existing content that we must unearth through our interpretive efforts for Gadamer the meaning of a text is what happens when we encounter it in the appropriate way In events of meaning the world makes itself intelligibly present to us in a manner that is uniquely and irreducibly bound up with the concrete situation in which we find ourselves When we recognize that Gadamer thinks of meaning in this way we are better positioned to appreciate what his wider views amount to and how they hang together Gadamer's accounts of interpretive normativity the aspectual character of understanding and the nature of essences for example snap into more vivid relief when we see them as outgrowths of his underlying conception of meanings as events The Event of Meaning in Gadamer's Hermeneutics will especially appeal to researchers and advanced students working in hermeneutics phenomenology and the philosophy of language More broadly it will be of interest to humanities teachers and researchers concerned with the question of how texts from distant cultures can be relevant to readers here and now **The**

that make a good translation a text focusing particularly on the empirical relationship between the theory of translation and its practice

Meaning and Textuality in the Middle Ages Mary K. Ramsey, R. M. Luizza, Andrew P. Scheil, Haruko Momma, Peter S. Hawkins, Michael G. Powell, Brian W. Gastle, Betsy McCorkmick, 2002 *Textualities* Hugh J. Silverman, 2013-10-28 *Textualities* is both an account of recent developments in Continental philosophy and a demonstration of philosophy as a distinctive theoretical practice of its own. It can be read as a presentation and evaluation of major figures from Heidegger and Merleau-Ponty to Foucault and Derrida with detailed accounts of Nietzsche, Sartre, Levi-Strauss, Barthes, Blanchot, and Kristeva.

The Blackwell Companion to Hermeneutics Niall Keane, Chris Lawn, 2016-01-19 THE BLACKWELL COMPANION TO HERMENEUTICS The Blackwell Companion to Hermeneutics is destined to become an invaluable resource for its incisive discussions of all aspects of hermeneutics within the field of philosophy. Burt Hopkins, Seattle University. This is an extraordinarily rich collection of articles on every aspect of hermeneutics. It covers not just the history of hermeneutics from the ancient Greeks to the present but also topics ranging from aesthetics and politics to pragmatism and deconstruction as analyzed by key thinkers such as Schleiermacher, Dilthey, Heidegger, Gadamer, Vattimo, and Apel. This Companion is an essential guide to the hermeneutic tradition. Dermot Moran, University College Dublin.

Hermeneutics, the philosophical theory of interpretation, has been one of the most influential strands of European thought over the last two hundred years or more. This comprehensive volume of essays with contributions by many leading experts in the field constitutes an ideal point of entry into the hermeneutic tradition. Its range and level of detail will also appeal to those who wish to advance their knowledge of hermeneutic philosophy and its many important consequences. Peter Dews, University of Essex.

The Blackwell Companion to Hermeneutics is a collection of original essays that provides a definitive historical, systematic, authoritative, and critical compendium of philosophical hermeneutics. The volume explores the art and theory of interpretation as it intersects with contemporary philosophical and interdisciplinary schools of thought, including humanism, politics, education, theology, literature, and law. Essays also include cutting-edge discussions of the relation of hermeneutics to the history of philosophy and address the major themes, topics, core concepts, and key figures at the heart of the discipline. The reference features 70 chapters from an international cast of leading and upcoming scholars who offer historically informed, philosophically comprehensive, and critically astute contributions in their individual fields of expertise. In doing so, they identify and enact different aspects of hermeneutical aims and approaches in an attempt to bear witness to both the inherent diversity of hermeneutics and also the constancy and fidelity of its return to history and tradition. Timely and thought-provoking, The Blackwell Companion to Hermeneutics is the only comprehensive reference work of its kind and offers a wealth of information for everyone with an interest in hermeneutics.

Doubt, Scholarship and Society in 17th-Century Central Sudan Dorrit van Dalen, 2016-07-11 The seventeenth century was a period of major social change in central Sudan. Islam spread from royal courts to rural communities, leading to new identities, new

boundaries and new tasks for experts of the religion Addressing these issues the Bornu scholar Mu ammad al W l acquired an exceptional reputation Dorrit van Dalen s study places him within his intellectual environment and portrays him as responding to the concerns of ordinary Muslims It shows that scholars on the geographical margins of the Muslim world participated in the debates in the centres of Muslim learning of the time but on their own terms Al W l s work also sheds light on a century in the Islamic history of West Africa that has until now received little attention *Is There a Meaning in this Text?* Kevin J. Vanhoozer, 2009 Written by a brilliant young author this book develops an evangelical theological hermeneutic that sees meaning in the text of Scripture **Handbook of Cultural Geography** Kay Anderson, 2003 The editors of this genuinely brilliant book seem to dare the reader to argue with them from the first page I would encourage everyone interested in cultural geography or in the cultural turn within a whole set of human geographies to do likewise ANNALS OF THE ASSOCIATION OF AMERICAN GEOGRAPHERS A richly plural and impassioned representation of cultural geography that eschews everything in the way of boundary drawing and fixity A re-visioning of the field as a set of engagements with the world it contains a vibrant atlas of ever shifting possibilities Throbbing with commitment and undisciplined in the most positive sense of that term it is exactly what a handbook ought to be Professor Allan Pred Department of Geography University of California at Berkeley Ten sections with a detailed editorial introduction the Handbook of Cultural Geography presents a comprehensive statement of the relation between the cultural imagination and the geographical imagination Emphasising the intellectual diversity of the discipline the Handbook is a textured overview that presents a state of the art assessment of the key questions informing cultural geography while also looking at resonances between cultural geography and other disciplines Progressive Intertextual Practice in Modern And Contemporary Literature Katherine Ebury, Christin M. Mulligan, 2024-05-07 This edited volume aims to reposition intertextuality in relation to recent trends in critical practice Inspired by the work of Sara Ahmed in particular our authors explore and reconfigure classic theories of authorship influence and the text including those by Roland Barthes Michel Foucault and Harold Bloom updating these conversations to include intersectionality specifically broadly understood to include gendered racial and other forms of social justice including disability and the progressive impact of the transmission and transformation of texts This diverse volume includes discussions of major canonical works such as James Joyce s *Ulysses* alongside the recent contemporary literature by authors such as Siri Husvedt and Maggie O Farrell as well as theoretical interventions This volume also engages with how intertextuality can facilitate interdisciplinary and ekphrastic thinking and representation as the inspiration of music and the visual arts for texts and their transmission is addressed The choice of intertexts become deliberately political ethical and artistic signifiers for the authors discussed in this volume and our contributors are thus enabled to address topics ranging from visual impairment to Shakespearean motherhood to the influence of Jazz culture on writing on the Northern Irish Troubles Music As Episteme, Text, Sign, and Tool Zachar Laskewicz, 2003 The primary intention of this work is to present

a set of alternative approaches to musicality where the object of analysis is the process of music making rather than the product or end result It uses as its source the concept of musicality as a way of comprehending reality rather than as a static reflection of it and Balinese music is the main cultural example What makes a text a text? Ulrike Gabert,2020-09-14 Essay from the year 2020 in the subject English Language and Literature Studies Linguistics grade 1 3 AKAD University of Applied Sciences Stuttgart language English abstract In this essay the question of what makes a text a text will be discussed The seven key criteria of textuality defined by Beaugrande and Dressler will be explained using an example of a classic American drama The question at what point a text is a text or whether a text can be called a text at all is one of the core questions of linguistics and goes all the way back to the ancient Greek language theory of Plato and Aristotle which dealt with this topic at the most basic level In the 1960s the expression text became a focus of linguists with the development several definitions of what a text is Since then numerous definitions have been formed and there is no consensus about which one is the best but one can find many similarities among them The 1981 work of the Austrian linguists Robert Alain de Beaugrande and Wolfgang U Dressler has been used as the basis for many discussions and definitions of text ever since Their work is often seen as a good framework for agreement which is based on seven criteria of textuality **Digital Textualities**

Post-Structuralism: A Note on the Philosophical School Pons Malleus, 2025-07-02 This book is an invitation into one of the most challenging provocative and enduring philosophical movements of the late 20th century post structuralism Emerging in the wake of structuralism's systematic approach to language culture and society post structuralism did not so much reject its predecessor as it questioned its foundational certainties It reoriented philosophical inquiry toward ambiguity contingency and the instability of meaning challenging our deepest assumptions about truth identity power and knowledge Post structuralism is not a unified doctrine or a clearly bounded school of thought Rather it is a constellation of thinkers Michel Foucault Jacques Derrida Gilles Deleuze Julia Kristeva Jean Baudrillard and others each charting a unique intellectual path What binds them however loosely is a shared skepticism toward totalizing narratives fixed categories and objective truths Where structuralism sought underlying systems whether linguistic anthropological or psychoanalytic post structuralism problematized those systems demonstrating how they are shaped by historical contingencies power dynamics and the play of language itself This book does not aim to simplify post structuralism into a set of clear rules or principles nor does it attempt to resolve its many internal tensions Instead it offers a guide through its core concepts difference deconstruction discourse power subjectivity and more while contextualizing them within the broader intellectual and historical landscape From Derrida's unsettling of the metaphysics of presence to Foucault's genealogies of knowledge and power from Deleuze's philosophy of becoming to Kristeva's theories of the abject post structuralism offers a relentless interrogation of the categories that structure thought and society Crucially this book seeks to clarify not codify The writing of many post structuralists is notoriously difficult sometimes maddeningly so This complexity is not a mere stylistic flourish it often reflects the very nature of the questions being asked questions that resist closure and demand a new kind of philosophical literacy Yet with patient reading and careful attention the rewards of engaging with post structuralist thought are profound It offers tools for examining the assumptions beneath our language institutions and identities revealing how what appears natural or self evident is often historically constructed and ideologically motivated This book is for students encountering post structuralism for the first time for scholars seeking a synthetic overview and for readers from other disciplines literature sociology political theory cultural studies who find themselves drawn to its critical promise It is written with the conviction that philosophy is not an abstract self contained enterprise but a living practice that helps us understand and perhaps reshape the world we inhabit In an age increasingly dominated by rigid ideologies identity essentialisms and algorithmic certainties the post structuralist impulse to question foundations to embrace complexity and to remain open to the other feels more urgent than ever Whether one ultimately agrees with its premises or not engaging seriously with post
