Meaning Discourse And Society Wolfgang Teubert:

Meaning, Discourse and Society Wolfgang Teubert, 2010-03-25 *Meaning Discourse and Society* investigates the construction of reality within discourse. When people talk about things such as language, the mind, globalisation or weeds, they are less discussing the outside world than objects they have created collaboratively by talking about them. Wolfgang Teubert shows that meaning cannot be found in mental concepts or neural activity as implied by the cognitive sciences. He argues instead that meaning is negotiated and knowledge is created by symbolic interaction, thus taking language as a social rather than a mental phenomenon. Discourses, Teubert contends, can be viewed as collective minds enabling the members of discourse communities to make sense of themselves and of the world around them. By taking an active stance in constructing the reality they share, people thus can take part in moulding the world in accordance with their perceived needs. The Discourse Studies Reader Johannes Angermüller, Dominique Maingueneau, Ruth Wodak, 2014-06-19 *Discourse Studies* is an interdisciplinary field studying the social production of meaning across the entire spectrum of the social sciences and humanities. The *Discourse Studies Reader* brings together 40 key readings from discourse researchers in Europe and North America, some of which are now translated into English for the first time. Divided into seven sections: Theoretical Inspirations, Structuralism versus Pragmatics, From Structuralism to Poststructuralism, Enunciative Pragmatics, Interactionism, Sociopragmatics, Historical Knowledge and Critical Approaches, the *Discourse Studies Reader* offers a comprehensive overview of the main currents in discourse studies, both discourse theory and discourse analysis. With short introductions elaborating the broader context, the sections present key selections from a variety of disciplinary backgrounds by placing them into their respective epistemological traditions. The *Discourse Studies Reader* is an indispensable textbook for students and scholars alike who are interested in discourse theoretical questions and working with discourse analytical methods.

Pragmatics of Discourse Klaus P. Schneider, Anne Barron, 2014-06-18 Discourse is language as it occurs in any form or context beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including among others conversation analysis, systemic functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings. **Critical Humanist Perspectives** Adrian Pabé, 2017-05-18 The present book is a collection of scholarly reflections on the theme of humanism from an integrational linguistic perspective. It studies humanist

thought in relation to the philosophy of language and communication underpinning it and considers the question whether being a humanist binds one to a particular view of language The contributions to this volume explore whether integrational linguistics being informed by a non mainstream semiology and adopting a lay linguistic perspective can provide better answers to contentious ontological and epistemological questions concerning the humanist project questions having to do with the self reason authenticity creativity free agency knowledge and human communication The humanist perspectives adopted by the contributors to this volume are critical insofar as they start from semiological assumptions that challenge received notions within mainstream linguistics such as the belief that languages are fixed codes of some kind that communication serves the purpose of thought transfer and that languages are prerequisites for communication

Variation in Time and Space Anna Čermáková, Markéta Malá, 2020-12-07 Variation in Time and Space Observing the World through Corpora is a collection of articles that address the theme of linguistic variation in English in its broadest sense Current research in English language presented in the book explores a fascinating number of topics whose unifying element is the corpus linguistic methodology Part I of this volume Meaning in Time and Space introduces the two dimensions of variation time and space relating them to the negotiation of meaning in discourse and questions of intertextuality Part II Variation in Time approaches the English language from a diachronic point of view the time periods covered vary considerably ranging from 16th century up to present day so do the genres explored Part III Variation in Space focuses on global varieties of English and includes a contrastive point of view The range of topics is again broad from specific lexico grammatical structures to the variation in academic English combining the regional and genre dimensions of variation This is a timely volume that shows the breadth and depth in current corpus based research of English

Patterns in Language and Linguistics Beatrix Busse, Ruth Moehlig-Falke, 2019-12-16 Despite its importance for language and cognition the theoretical concept of pattern has received little attention in linguistics so far The articles in this volume demonstrate the multifariousness of linguistic patterns in lexicology corpus linguistics sociolinguistics text linguistics pragmatics construction grammar phonology and language acquisition and develop new perspectives on pattern as a linguistic concept

Phraseology and the Advanced Language Learner Svetlana Vetchinnikova, 2019-11-28 Explores the process of word selection in second language use and the factors which determine the writer's choice of words

Patterns in Contrast Jarle Ebeling, Signe Oksefjell Ebeling, 2013-09-17 Combining the fields of phraseology and contrastive analysis this book describes how patterns defined as recurrent word combinations with semantic unity behave cross linguistically As the contrastive approach adopted in the book relies on translations and a bidirectional corpus model the first part offers an in depth discussion of contrastive linguistics with special emphasis on using translations as tertium comparationis and a parallel corpus as the main source of material Central to the contrastive analysis is the use of corpus linguistic methods in the identification of patterns while a deeper understanding of the phraseological nature of the patterns is closely related to the

concept of extended units of meaning The second part of the book presents five case studies using an easy to follow step by step method to illustrate the phraseological contrastive approach at work The studies show that patterns weave an intricate web of meanings across languages and demonstrate the potential of exploring patterns in contrast

Migration and Media Lorella Viola, Andreas Musolff, 2019-03-07 The socio discursive landscape surrounding the migration debate is characterised by a growing sense of crisis in both personal and collective identities From this viewpoint discourses about immigration are also always attempts at reconstructing the threatened home identity of the respective host society It is such attempts at reasserting identity in crisis due to migration that are the focus of the volume Migration and Media Discourses about identities in crisis This four part book explores the representational strategies used to frame current migration debates as crises of identity collective and individual It features fourteen case studies of varying sets of data including print media texts TV broadcasts online forums politicians speeches legal and administrative texts and oral narratives drawn from discourses in a range of languages Croatian English French German Greek Italian Lithuanian Polish Russian Serbian Slovenian Spanish and Ukrainian and it employs different discourse analytical methods such as Argumentation and Metaphor Analysis Gendered Language Studies Corpus assisted Semantics and Pragmatics and Proximity Theory Such a diverse range of sources languages and approaches provides innovative methodological and theoretical analysis on migration and identity which will be of interest to scholars students and policy makers working in the fields of migration studies media studies identity studies and social and public policy As of January 2023 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched

Corpus Linguistics, Context and Culture Viola Wiegand, Michaela Mahlberg, 2019-11-18 Corpus Linguistics Context and Culture demonstrates the potential of corpus linguistic methods for investigating language patterns across a range of contexts Organised in three sections the chapters range from detailed case studies on lexico grammatical patterns to fundamental discussions of meaning as part of the discourse contexts and cultures theme The final part on learner

contexts specifically emphasises the need for mixed method approaches and the consideration of pedagogical implications for real world contexts Beyond its contribution to current debates in the field this edited volume indicates new directions in cross disciplinary work

The Language of Inequality in the News Michael Toolan, 2018-12-06 Why in the early 1970s does The Times reject the idea of a national lottery as rewarding luck not merit and effort but warmly welcome one by the 1990s Why in the 1970s do the Daily Mail s TV reviews address serious contemporary themes such as class and race relations whereas forty years later they are largely concerned with celebrities talent shows and nostalgia Why does the Conservative Chancellor in the 2010s mention Britain so very often when the Conservative Chancellor in the 1970s scarcely does at all Covering news stories spanning fort five years Michael Toolan explores how wealth inequality has been presented in centre right British newspapers focusing on changes in the representation may have helped present day inequality seem justifiable Toolan employs corpus linguistic and critical discourse analytic methods to identify changing lexis and verbal patterns and gaps all of which contribute to the way wealth inequality was represented in each of the decades from the 1970s to the present

Evaluation in Context Geoff Thompson, Laura Alba-Juez, 2014-02-04 It is now an acknowledged fact in the world of linguistics that the concept of evaluation is crucial and that there is very little if any discourse that cannot be analyzed through the prism of its evaluative content This book presents some of the latest developments in the study of this phenomenon Released more than a decade later than Hunston and Thompson s 2000 *Evaluation in Text* *Evaluation in Context* is designed as its sequel in an attempt to continue update and extend the different avenues of research opened by the earlier work Both theoretical and empirical studies on the topic are presented with the intention of scrutinizing as many of its dimensions as possible by not only looking at evaluative texts but also considering the aspects of the discursive context that affect the final evaluative meaning at both the production and reception stages of the evaluative act The editors main objective has been to gather contributions which investigate the manifold faces and phases of evaluation by presenting a wide variety of perspectives that include different linguistic theories e g Axiological Semantics Functionalism or Politeness Theory different levels of linguistic description e g phonological lexical or semantic and different text types and contexts e g the evaluation found in ironic discourse the multimodality of media discourse or the world of politics just to name a few The volume can be of use not only for scholars who study the evaluative function of language but also for students who wish to pursue research in the area

Corpus Perspectives on Patterns of Lexis Hilde Hasselgård, Jarle Ebeling, Signe Oksefjell Ebeling, 2013-06-15 A hallmark of corpus linguistics is the study of patterns of language use The studies presented in this volume all use corpora to investigate patterns of lexis from various perspectives The first section Sequence and Order presents theoretical and practical aspects of the linguist s task of uncovering the principles that determine such patterns The next section Competing Constructions discusses the relationship between lexical patterns with similar meanings in the light of diachronic regional and register variation New developments in terms of lexicogrammatical meaning and patterning are

dealt with in the section Emerging Patterns The final section Correlating patterns and meaning discusses ways in which meaning can be studied in corpus data despite the lack of narrowly defined search terms Though situated at different points on a continuum between lexical and grammatical emphasis the studies all confirm the inseparability of lexis and grammar

Embodied Histories, Imagined Worlds, Emplaced Resistance Ashraf Abdelhay, Sinfree Makoni, Cristine Severo, 2025-12-08 Contemporary sociolinguistic theorizing is concerned with the study of social solidarity in differential contexts of power so it must engage with protesting discourses and practices In two volumes Sociolinguistics of Protesting addresses the socio discursivity of protesting from different geopolitical perspectives and illustrates how protests are socio semiotically organized and narrated Volume 1 the current volume critically rethinks protest as a central sociolinguistic practice rather than an exception to an imagined social order Drawing on transdisciplinary and various case studies from the Arab revolutions to Hong Kong's Lennon Walls and South Africa's student uprisings this volume explores how language embodiment and space intersect in acts of resistance It is the first of a two volume set that reshapes the field's understanding of language in times of crisis and uprising In Volume 2 scholars explore the complex intersections between protest language and decolonial thought It challenges dominant linguistic ideologies by uncovering how language is wielded contested and reimagined in protests against racial gendered and colonial violence From Black feminist activism in the U S to anti mining movements in South Africa and pandemic protests in Chile the chapters examine how diverse embodied linguistic practices resist dominant power structures and give voice to marginalized communities

Current Issues in Intercultural Pragmatics Istvan Kecskes, Stavros Assimakopoulos, 2017-06-15 Having been established as a field in its own right for the last decade intercultural pragmatics is increasingly being recognized as an important area of research among scholars working in pragmatics The present volume is a collection of selected papers from the 6th International Conference on Intercultural Pragmatics and Communication admittedly the biggest venue for researchers in the area and comprises contributions that report on recent research that deals with or can directly inform work in intercultural pragmatics Given the breadth of research areas that are represented herein ranging from lingua franca and business communication to the study of cultural perceptions translation and pragmatic development this volume is bound to be of interest to not only students and scholars engaged in the area of intercultural pragmatics but also to all those with a more general interest in the sociocultural turn in the study of pragmatics

Postcolonial Manchester Lynne Pearce, 2015-11-01 Postcolonial Manchester offers a radical new perspective on Britain's devolved literary cultures by focusing on Manchester's vibrant multicultural literary scene Referencing Avtar Brah's concept of diaspora space the authors argue that Manchester is and always has been a quintessentially migrant city to which workers of all nationalities and cultures have been drawn since its origins in the cotton trade and the expansion of the British Empire This colonial legacy and the inequalities upon which it turns is a recurrent motif in the texts and poetry performances of the contemporary Mancunian writers featured here many of them members of

the city's long established African African Caribbean Asian Chinese Irish and Jewish diasporic communities By turning the spotlight on Manchester's rich yet under represented literary tradition in this way Postcolonial Manchester also argues for the devolution of the canon of English Literature and in particular recognition for contemporary black and Asian literary culture outside of London *Language for Specific Purposes* Giuliana Elena Garzone, Dermot Heaney, Giorgia

Riboni, 2017-01-06 This volume brings together work by both well known scholars and emerging researchers in the various areas of Language for Specific Purposes LSP such as political legal medical and business discourse The volume is divided into three parts in order to align rather than separate three different but related aspects of LSP namely translation linguistic research and domain specific communication on the web Underlying all the contributions here is the growing awareness of the ever increasing multiformity of specialised communication and the ever wider social implications of the communicative situations in which it is embedded especially where it involves the need to move across languages cultures and modes as in translation and interpreting The contributions consistently bear witness to the need to review received notions pose new questions and explore fresh perspectives The picture that emerges is one of extreme complexity in which researchers into specifically linguistic aspects of LSPs and their translation across languages and media declare their awareness of the pressing need to come to terms with a wide range of social pragmatic intercultural and political factors above and beyond socio technical knowledge of the domains under investigation Principles of Subjective Anthropology Binggong

Chen, 2023-03-27 This book puts forward the concept of subjective anthropology and outlines a theoretical system that will allow subjective anthropology to qualify as a new academic discipline in its own right In an effort to respond to the field's proper role as the science of humanity subjective analysis has been introduced into the study of anthropology The book fills two distinct gaps in our knowledge and understanding of modern man offering detailed descriptions of personality and of groups while also advancing the theory of structure and choice The book formulates seven basic principles of subjective anthropology and divides anthropology into three major branches subjective anthropology cultural anthropology and biological or physical anthropology which can be further divided into sub branches The book pursues three key goals advancing and developing the theoretical system of subjective anthropology reconstructing the discipline of anthropology and establishing a Chinese anthropology with Chinese characteristics Chinese visions and Chinese styles
