Meaning In Suffering Comfort In Crisis Through Logotherapy:

Meaning in Suffering Elisabeth S. Lukas, 1986 Logotherapy and Existential Analysis Charles L. McLafferty, Jr., Jay Levinson, 2024-04-13 The second volume in the series presents ground breaking advances of Viktor Frankl's logotherapy and existential analysis with emphasis on the discovery of meaning as central to coping resilience and growth. Noted contributors from around the world present empirical and case study evidence for the importance of meaning in diverse populations and settings as well as theoretical and philosophical perspectives on Frankl's body of thought. The book opens with a historical perspective of the development of logotherapy and personal experiences of those close to Frankl. A section on the amelioration of suffering provides insights into moral injury and finding meaning in blows of fate, unavoidable suffering, death, the injustice of poverty and international conflict. Powerful case studies address Frankl's tragic triad: guilt, suffering, death, facing the end of life, PTSD, childhood sexual abuse, neglect, and suicide prevention. Empirical studies address the search for purpose in life, qualities of meaning among the gifted, and service motivation in college students. Meaning-centered approaches are applied to working with youth and adults in schools and the workplace. Philosophical applications of logotherapy connect Frankl's theory with Buddhist thought and a flaw in the nature vs. nurture theory. The dimensional ontology is expanded into four dimensions. Book reviews evaluate topics of interest to logotherapists. Topics include: Case studies using logotherapy in diverse settings; Meaning-centered programs and interventions in the workplace; Innovative approaches to finding meaning with at-risk children and young adults; Applications of logotherapy in military and childhood PTSD; Cross-disciplinary collaboration of logotherapy with rational emotive therapy, cognitive behavior therapy, positive psychology, and Theravada Buddhism. Philosophical applications and extensions of logotherapy. Empirical studies on processes and measures of logotherapy. Volume II of Logotherapy and Existential Analysis is intended for caregivers, practitioners, researchers, and students in the fields of logotherapy, mental health, education, workplace management, industrial psychology, and laypeople interested in finding meaning.

Middle Range Theory for Nursing, Second Edition Patricia R. Liehr PhD, ARNP, Mary Jane Smith PhD, RN, 2008-09-17 2009 AJN Book of the Year Award Winner. Designated a Doody's Core Title. Middle Range Theory for Nursing is a textbook designed for theory and research courses in master's and doctoral programs. As described in the 2d edition of the Encyclopedia of Nursing Research, middle range theory is a basic, usable structure of ideas, less abstract than grand theory and more abstract than empirical generalizations or micro range theory. Middle range theories are developed and grown at the intersection of practice and research to provide guidance for everyday practice and scholarly research rooted in the discipline of nursing. In this revised and updated second edition, the authors will revise the eight theories that were examined in the first edition with published research and practice updates along with any changes in the basic concepts and models. Seven new theories will be added. Each theory is presented by the theorist in a consistent format: purpose of the theory, basic concepts, relationships among the concepts, the model, use of the theory in nursing.
