Devinney, George S. Yip, Gerry Johnson, 2015 Organizational performance is one of the most important constructs in management research We review the contexts that frame organizational performance as a dependent variable with specific emphasis on how it is operationalized and measured The research contexts of past studies are firmly anchored around a multidimensional conceptualization of organizational performance related predominately to stakeholders heterogeneous market circumstances and time The review of the operationalization and measurement of performance highlights the limited effectiveness of commonly accepted measurement practices in tapping this multidimensionality By synthesizing the literature the foundations are laid for the improved measurement of performance in management research We conclude with a call for research that examines the effectiveness of triangulation utilizing multiple measures applies longitudinal data and brings to bear alternative methodological formulations as means of appropriately aligning research contexts with the measurement of organizational performance Validating these measurement approaches is an important agenda for further research Previous Title Measuring Organizational Performance in Management Research A Synthesis of Measurement Challenges and Approaches

Measuring Organizational Performance Pierre J. Richard, 2015 Organizational performance is one of the most important constructs in management research Reviewing past studies reveals a multidimensional conceptualization of organizational performance related predominately to stakeholders heterogeneous product market circumstances and time A review of the operationalization of performance highlights the limited effectiveness of commonly accepted measurement practices in tapping this multidimensionality Addressing these findings requires researchers to possess a strong theoretical rationale on the nature of performance i e theory establishing which measures are appropriate to the research context and rely on strong theory as to the nature of measures i e theory establishing which measures should be combined and the method for doing so All management research on performance should explicitly address these two requirements The authors conclude with a call for research that examines triangulation using multiple measures longitudinal data and alternative methodological formulations as methods of appropriately aligning research contexts with the measurement of organizational performance Measuring organizational performance Rensis Likert, 1958 **Organizational Performance and Measurement in the Public Sector**

Arie Halachmi, Geert Bouckaert, 1996-03-20 Legislative initiatives in response to public demands for more accountability require public agencies at all levels of government to measure organizational performance and to report on service efforts and accomplishments SEA What considerations should managers use in developing performance measurement protocols What is the experience to date in the U S and abroad This collection of original articles aims to put performance measurement in perspective by relating it to the budgeting auditing and policy making processes Towards that end the issues managers need to consider are examined in a critical way and from various points of view A

Measuring Organizational

Transforming Performance

Measurement Dean R. Spitzer, You can't accurately gauge your company's performance if you don't know what or how to measure. It's no secret that you can't improve your organization's performance without measuring it. In fact, every function, unit, process, and the organization as a whole is built and run according to the parameters and expectations of its measurement system. So you'd better make sure you're doing it right. All too often, performance measurement creates dysfunction, whether among individuals, teams, or across entire divisions and companies. Most traditional measurement systems actually encourage unhealthy competition for personal gain, creating internal conflict and breeding distrust of performance measurement. Transforming Performance Measurement presents a breakthrough approach that will not only significantly reduce those dysfunctions but also promote alignment with business strategy, maximize cross-enterprise integration, and help everyone to work collaboratively to drive value throughout your organization. Performance improvement thought leader Dean Spitzer explains why performance measurement should be less about calculations and analysis and more about the crucial social factors that determine how well the measurements get used. His socialization of measurement process focuses on learning and improvement from measurement and on the importance of asking such questions as: How well do our measures reflect our business model? How successfully are they driving our strategy? What should we be measuring and not measuring? Are the right people having the right measurement discussions? Performance measurement is a dynamic process that calls for an awareness of the balance necessary between seemingly disparate ideas: the technical and the social aspects of performance measurement. For example, you need technology to manage the flood of data, but you must make sure that it supports the people who will be making decisions and taking action crucial to your organization's success. This book shows you how to design that technical-social balance into your measurement system. While it is urgent to start taking action now, transforming your organization's performance measurement system will take time. Transforming Performance Measurement gives you assessment tools to gauge where you are now and a roadmap for moving with little or no disruption to a more transformational and mature measurement system. The book also provides 34 TMAPs.

Measuring Workplace Performance Michael J. O'Neill,2016-04-19 Most Fortune 1000 companies still struggle with workspace planning and design issues. They invest millions of dollars each year with the expectation that new buildings and major renovations will help transform their culture, support innovation, strengthen desired behaviors, and increase organizational effectiveness. And let's not forget reducing costs.
