The Iron Whim Darren Sean Wershler-Henry, 2007 The Iron Whim is an intelligent irreverent and humorous history of writing culture and technology It covers the early history and evolution of the typewriter as well as the various attempts over the years to change the keyboard configuration but it is primarily about the role played by this marvel in the writer's life Darren Wershler Henry populates his book with figures as disparate as Bram Stoker Mark Twain Franz Kafka Norman Mailer Alger Hiss William Burroughs J G Ballard Jack Kerouac Hunter S Thompson Northrop Frye David Cronenberg and David Letterman the soundtrack ranges from the industrial clatter of a newsroom full of Underwoods to the more muted tapping and hum of the Selectric Wershler Henry casts a bemused eye on the odd history of early writing machines important and unusual typewritten texts the creation of *On the Road* and the exploits of a typewriting cockroach named Archy numerous monkeys poets and even a couple of vampires He gathers into his narrative typewriter related rumors and anecdotes Henry James became so accustomed to dictating his novels to a typist that he required the sound of a randomly operated typewriter even to begin to compose And by broadening his focus to look at typewriting as a social system as well as the typewriter as a technological form he examines the fascinating way that the tool has actually shaped the creative process With engaging subject matter that ranges over two hundred years of literature and culture in English *The Iron Whim* builds on recent interest in books about familiar objects and taps into our nostalgia for a method of communication and composition that has all but vanished

Bottleneck William Robert Catton,2009 Ecological roots of our troubled time are deeper than its economic manifestations Anguished posterity will look back on this 21st century as the bottleneck century Bottleneck Humanity s Impending Impasse was written to show how and why three converging trends have put humankind in much deeper peril than is generally acknowledged First there

are many more of us inhabiting this planet than it can sustain Second technological advances of recent centuries have made gigantic and prodigal our per capita resource appetites and our per capita environmental impacts Third even though as the symbol using species we humans conceivably could do better at anticipating future circumstances and planning ahead our evolutionary heritage together with unanticipated dysfunctions of modern division of labor have kept us too preoccupied with short term concerns People today are dependent upon a fantastically intricate web of exchange relations the market Even when functioning normally and not in a collapsed condition as currently this system of relations has a serious and pervasive dehumanizing effect not adequately discerned by economists nor sociologists Recognition of and adequate adaptation to the deteriorating ecological context of human life has been impeded Human societies even our own are almost certainly going to act in ways that will make an inevitably difficult future unnecessarily worse Factors analyzed in this book have made people seriously averse to the kind and extent of cooperation our difficult future will require Together with the basic trio of disturbing trends humans having become so numerous so ravenous and so short sighted this has made the nature of today s human prospect far more dire than most policymakers dare admit It tempts even the wisest and most civic minded to seek or promote remedial policies that will worsen the real predicament
