Handbook of Intensive Care R. S. Atkinson, J. J. Hamblin, J. E. C. Wright, 2013-11-11 The experience of active management of patients in the intensive care unit of a busy district general hospital has convinced us of the value of team work which allied to enthusiasm and clinical expertise provides the recipe for success It is in this spirit that the present volume has been written and the authors are grateful to their colleagues who have given advice In some cases this has been extended to the compilation of a special chapter and we are indebted to Dr Dathan Dr Layton and Dr Rushman for their contributions In this book we have attempted to set down the principles of intensive care as they concern the typical district general hospital without specialist units or the back up of research departments In doing this we have tried to maintain simplicity and to give practical advice The book is not aimed at the specialist in intensive care who can draw on his own extensive experience but rather at the junior doctor who takes his turn working in the intensive care unit In particular we have considered the needs of those who require some information outside the parent speciality We are also aware that in many British hospitals consultants assume a duty responsibility for patients in intensive care units and we hope that the information in this volume may be of some help to them Trained nurses should also find this book of value **A Manual of Respiratory Failure** Eli Rush Crews (enseignant en chirurgie clinique), Leopoldo Lapuerta (directeur médical), 1972
