Mechanisms of Woody Plant Defenses Against Insects William J. Mattson, Jean Leveux, C. Bernard-Dagan, 2012-12-06 Mechanisms of Woody Plant Defenses Against Insects William J. Mattson, Jean Leveux, C. Bernard-Dagan, 1987-12-18 **Invasive Forest Insects, Introduced Forest Trees, and Altered Ecosystems** Timothy D. Paine, 2007-05-24 Demand for timber and fibre continues to grow and is being met by increased reliance on plantation forestry Many of the plantations that are being grown around the globe are non native species that have characteristics of rapid growth and good commercial qualities In some cases the high rates of production are a result of the absence of native herbivore and diseases This limited pest status is threatened as pest species move around the globe At the same time there is concern about threats of these non native plantation species on native communities and the impact of changing climates on forest productivity This volume explores many of these issues for the first time *Forest Insect Guilds*, 1991 General Technical Report NC, 1981 General Technical Report NE, 1980 *Plant Secondary Compounds in Forest Ecosystems Under Global Change: From Defense to Carbon Sequestration* Bartosz Adamczyk, Judy Simon, 2019-10-10 **Functional Dynamics of Phytophagous Insects** T. N. Ananthakrishnan, 1994 Plant Defense Against Herbivores Michael Trent Stevens, 2005 Chemical Ecology of Phytophagous Insects T. N. Ananthakrishnan, 1993 Contributed articles **Sawfly Life History Adaptations to Woody Plants** Michael R. Wagner, Kenneth F. Raffa, 1993 An international group of ecologists entomologists and foresters have united to explore the life history traits of the Symphyta or sawflies This volume provides a treatment of these pests their life history characteristics and evolutionary innovations for living on woody plants **Annales zoologici fennici**, 1994 *Bibliography of Agriculture*, 1995 Phytochemical Induction by Herbivores Douglas W. Tallamy, Michael J. Raupp, 1991-07-17 Recent research indicates that plants may be defended by mechanisms activated only after a plant has been challenged by a herbivore Examines these inducible defenses and provides a framework for future advances in the field Also serves as a summary and compilation of major studies to date on important areas of plant and insect ecology While treating both vertebrates and invertebrates it covers mechanisms and models of long and short term induction The impact of inducible phytochemicals on herbivores is extensively discussed as are pesticidal activity of inducible phytochemicals Covers agricultural implications of inducible phytochemicals **Frontiers of Population Ecology** R. B. Floyd, Andrew Walter Sheppard, Paul Joseph De Barro, 1996 This book provides a contemporary view of the major issues facing ecologists and outlines some of the strengths and weaknesses of the current ecological framework and its utility in managing biological systems It includes contributions from world experts and looks at important themes including theoretical and experimental population ecology the conservation of endangered species the management of pests and the sustainable management of resources The chapters deal with a wide range of organisms including plants pathogens insects molluscs birds marine and terrestrial mammals New technologies and approaches are also covered **Redia**, 1997 **Herbivores:**

Their Interactions with Secondary Plant Metabolites Gerald A. Rosenthal, May R. Berenbaum, 1991-11-04 V 1 The chemical participants v 2 Ecological and evolutionary processes Forest Science, 2016 *Leptographium Species* Karin Jacobs, Michael J. Wingfield, 2001 This new book is the first single source of taxonomic information on *Leptographium* species *Leptographium Species* Tree Pathogens Insect Associates and Agents of Blue Stain covers all known species of the fungi Detailed illustrations comprehensive descriptions and keys to the species will aid in the identification of this destructive fungi which is amongst the most important causal agents of sapstain in timber Most of these fungi are carried by bark beetles and the complex ecology of the relationships between *Leptographium* and their vectors has intrigued plant pathologists mycologists entomologists ecologists and foresters for years This single resource will help anyone working with lumber accurately identify all known species of these fungi Forest Ecology Burton Verne Barnes, 1998-02-24 This revised and reorganized text is designed for a standard forest ecology course for undergraduates in forestry natural resources environmental science environmental ecology and field ecology programs Provides an eminently current perspective on the material by emphasizing forest ecosystems using a landscape ecosystem or geo ecosystem approach Written by both field teachers and researchers of forest ecology and practitioners of forest ecology in both public and private arenas Treats traditional plant ecology topics of community succession biota from a landscape ecosystem perspective also emphasizes earth science
