Mechanization Takes Command - a Contribution to Anonymous History, 1943 **McLuhan in Space** Richard Cavell,2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture **Capitalism Takes Command** Michael Zakim,Gary J. Kornblith,2012-02 Most scholarship on nineteenth century America s transformation into a market society has focused on consumption romanticized visions of workers and analysis of firms and factories Building on but moving past these studies *Capitalism Takes Command* presents a history of family farming general incorporation laws mortgage payments inheritance practices office systems and risk management an inventory of the means by which capitalism became America s new revolutionary tradition This multidisciplinary collection of essays argues not only that capitalism reached far beyond the purview of the economy but also that the revolution was not confined to the destruction of an agrarian past As business ceaselessly revised its own practices a new demographic of private bankers insurance brokers investors in securities and start up manufacturers among many others assumed center stage displacing older elites and forms of property Explaining how capital became an ism and how business became a political philosophy *Capitalism Takes Command* brings the economy back into American social and cultural history *Atari Design* Raiford Guins,2020-11-12 Drawing from deep archival research and extensive interviews *Atari Design* is a rich historical study of how Atari s industrial and graphic designers contributed to the development of the video game machine Innovative game design played a key role in the growth of Atari from Pong to Asteroids and beyond but fun challenging and exciting game play was not unique to the famous Silicon Valley company What set it apart from its competitors was innovation in the coin op machine s cabinet Atari did not just make games it designed products for environments With tasteful packaging Atari exceeded traditional locations like bars amusement parks and arcades developing the look and feel of their game cabinets for new locations such as fast food restaurants department stores country clubs university unions and airports making game play a ubiquitous social and cultural experience By actively shaping the interaction between user and machine overcoming styling limitations and generating a distinct corporate identity Atari designed products that impacted the everyday visual and material culture of the late 20th century Design was never an afterthought at Atari **Eating Architecture** Jamie Horwitz,Paulette Singley,2006-02-17 A highly original collection of essays that explore the relationship between food and architecture the preparation of meals and the production of space The contributors to this highly original collection of essays explore the relationship between food and architecture asking what can be learned by examining the often metaphorical intersection of the preparation of meals and the production of space In a

culture that includes the Food Channel and the knife juggling chefs of Benihana food has become not only an obsession but an alternative art form. The nineteen essays and Gallery of Recipes in *Eating Architecture* seize this moment to investigate how art and architecture engage issues of identity, ideology, conviviality, memory, and loss that cookery evokes. This is a book for all those who opt for the combination platter of cultural inquiry as well as for the readers of M F K Fisher and Ruth Reichl. The essays are organized into four sections that lead the reader from the landscape to the kitchen, the table, and finally the mouth. The essays in *Place Settings* examine the relationships between food and location that arise in culinary colonialism and the global economy of tourism. *Philosophy in the Kitchen* traces the routines that create a site for aesthetic experimentation, including an examination of gingerbread houses as art, food, and architectural space. The essays in *Table Rules* consider the spatial and performative aspects of eating and the ways in which shared meals are among the most perishable and preserved cultural artifacts. Finally, *Embodied Taste* considers the sensual apprehension of food and what it means to consume a work of art. The *Gallery of Recipes* contains images by contemporary architects on the subject of eating architecture.

Re-Humanizing Architecture Ákos Moravánszky, Judith Hopfengärtner, 2016-12-19 After the Second World War, a divided Europe was much affected by a period of reconstruction. This was influenced by the different political systems in the socialist East and in the capitalist West; the focus was on cohesion in society and its cultural and architectural expression. In parallel to the rapidly progressing industrialization of the building industry, debates on the humanization of the built environment were led on both sides with great intensity. The volume shows how, on the back of existentialism, new monumentality and socialist realism, quite similar concepts and strategies were developed in order to find answers to questions relating to adequate structures for new forms of community and identity.

The Architecture of Bathing Christie Pearson, 2020-10-06 A celebration of communal bathing, swimming pools, saunas, beaches, ritual baths, sweat lodges, and more, viewed through the lens of architecture and landscape. We enter the public pool, the sauna, or the beach with a heightened awareness of our bodies and the bodies of others. The phenomenology of bathing opens all of our senses toward the physical world, entwined with the social, while the history of bathing is one of shared space in both natural and built environments. In *The Architecture of Bathing*, Christie Pearson offers a unique examination of communal bathing and its history from the perspective of architecture and landscape. Engagingly written and richly illustrated with more than 260 illustrations, many in color, *The Architecture of Bathing* offers a celebration of spaces in which public and private, sacred and profane, ritual and habitual, pure and impure, nature and culture commingle. Pearson takes a wide-ranging view of her subject, drawing on architecture, art, and literary works. Each chapter is structured around an architectural typology and explores an accompanying theme, for example, tub sensuality, river flow, waterfall, rejuvenation, and banya immersion. Offering examples, introducing relevant theory, and recounting personal experiences, Pearson effortlessly combines a practitioner's zest with astonishing erudition. As she examines these forms, we see that they are inextricable from landscapes, bodily practices, and

cultural production Looking more closely we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world

Architecture in the United States Dell Upton, 1998 From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York American architecture is incredibly varied In this revolutionary interpretation Upton examines American architecture in relation to five themes community nature technology money and art 109 illustrations 40 linecuts Map

Healing Spaces, Modern Architecture, and the Body Sarah Schrank, Didem Ekici, 2016-07-15 Healing Spaces Modern Architecture and the Body brings together cutting edge scholarship examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book's contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture

The Process Genre Salomé Aguilera Skvirsky, 2020-03-20 From IKEA assembly guides and hands and pans cooking videos on social media to Mister Rogers's classic factory tours representations of the step by step fabrication of objects and food are ubiquitous in popular media In The Process Genre Salomé Aguilera Skvirsky introduces and theorizes the process genre a heretofore unacknowledged and untheorized transmedial genre characterized by its representation of chronologically ordered steps in which some form of labor results in a finished product Originating in the fifteenth century with machine drawings and now including everything from cookbooks to instructional videos and art cinema the process genre achieves its most powerful affective and ideological results in film By visualizing technique and absorbing viewers into the actions of social actors and machines industrial educational ethnographic and other process films stake out diverse ideological positions on the meaning of labor and on a society's level of technological development In systematically theorizing a genre familiar to anyone with access to a screen Skvirsky opens up new possibilities for film theory

Nature's Metropolis: Chicago and the Great West William Cronon, 2009-11-02 A Finalist for the Pulitzer Prize and Winner of the Bancroft Prize No one has written a better book about a city Nature's Metropolis is elegant testimony to the proposition that economic urban environmental and business history can be as graceful powerful and fascinating as a novel Kenneth T Jackson Boston Globe

The Emergence of Cinematic

Time Mary Ann Doane, 2002-12-27 In a work that captures and reconfigures the passing moments of art history and philosophy Mary Ann Doane shows how the cinema representing the singular instant of chance and ephemerality in the face of the increasing rationalization and standardization of the day participated in the structuring of time and contingency in capitalist modernity

Ecstatic Worlds Janine Marchessault, 2017-08-25 When media translate the world to the world twentieth century utopian projects including Edward Steichen's Family of Man Jacques Cousteau's underwater films and Buckminster Fuller's geoscope Janine

Experimenting the Human G Douglas Barrett, 2023-01-13 Beyond the modernist project of subjecting sound parameters to the deterministic human control exemplified by serialism experimentalism has used indeterminacy beginning with chance and natural processes and later incorporating computer algorithms biofeedback and AI in ways that mirror posthumanism's challenge to the centrality of human agency Through a series of six intimate studies of works by Alvin Lucier Nam June Paik Pamela Z and Laetitia Sonami Barrett places posthuman thought in dialogue with works of experimental music surveyed from the 1960s to the present In addition to studies of individual musical works he illustrates existing exchanges between experimental music and cybernetics theorists since the 1950s and links this dialogue to posthumanist theory beginning in the 1990s for which those very cyberneticists were a primary point of departure

Representations of Emotions Jürgen Schlaeger, 1999

Photography and Ontology Donna West Brett, Natalya Lusty, 2018-09-03 This edited collection explores the complex ways in which photography is used and interpreted as a record of evidence as a form of communication as a means of social and political provocation as a mode of surveillance as a narrative of the self and as an art form What makes photographic images unsettling and how do the re uses and interpretations of photographic images unsettle the self evident reality of the visual field Taking up these themes this book examines the role of photography as a revelatory medium underscored by its complex association with history memory experience and identity

The Architect's Dream Sean Pickersgill, 2023-09-29 Sean Pickersgill demonstrates that the goal of creating meaningful architecture can take a variety of critical and philosophical paths The importance of architecture as an expression of broad complex social drivers is complemented by the equally popular idea that architecture as an intellectual pursuit retains its own autonomy as a self referential culture This book uniquely places the emphasis for innovation in architecture within the domain of critical thinking generally and a specific understanding of the semantics of built form The book draws on a broad range of subject areas from film to philosophy to anthropology to mathematics and economics to show that the path to meaningful creative practice is always based in an understanding of the principal drivers for change and meaning in society It is not a simple recipe book or workshop manual for others to reproduce It requires the engaged reader to employ their own creative abilities to find what potential lies in each of the propositions and it will encourage the scholastic architect to continue to mine the rich veins of intellectual culture to demonstrate the latent purposiveness inherent in all meaningful architecture
