

MECP Certification Exam Contents

All MECP exams require a passing score of 70% or greater in EACH SECTION of the exam to successfully pass the whole exam. One failed section will result in a failed exam. All MECP exams have a time limit of three hours.

BASIC INSTALLATION TECHNICIAN CERTIFICATION – No Experience Prerequisite

The Basic Installation Technician certification exam contains 120 multiple choice questions and is divided into five sections. This exam is intended for entry level technicians with little to no professional experience. Use the MECP Basic Installation Technician study guide and online practice exam at MECP.com as study resources for this exam.

Basic Electronics and Automotive Electrical Section (40 Questions)

- 1) **Ohm's Law** (20% of Section 1) – These questions require basic knowledge and understanding of Ohm's Law, the related components (voltage, current, resistance, power, watts, amper, etc.) as applied in a circuit and that math involved to solve specific problems. Since calculations are not allowed on the MECP Basic Installation Technician Exam, the actual math is considered to be at a basic grade school level.
- 2) **Electronic Components** (20% of Section 1) – These questions deal with physical electronic components, such as resistors, capacitors, relays, diodes, batteries, power wires, fuses, etc. as well as how or where they apply. The section also covers related units of measure, such as Ohms, Farads, and Henrys.
- 3) **Automotive Electrical System Components and Applications** (20% of Section 1) – This section tests on the components and applications of the automotive electrical system itself – what the parts do and why they are there as well as how different installations must consider various aspects of an automotive electrical system.

Entry Level Installation Technique & Shop Safety Section (40 Questions)

- 4) **Components Applications and Usage** (10% of Section 2) – These questions pertain to the test that a component or installation accessory is applied or used in an installation. Also includes wiring diagrams, symbols, and terminology related to installation. Many MECP based practices for general installation are contained in this section.
- 5) **Troubleshooting, Measurements, and Analysis – (DMM) use** (30% of Section 2) – This section covers the identification and diagnosis of common installation errors and components that don't operate properly. This section also includes the use of tools that aid in diagnosis, most notably the Digital Multimeter (DMM).
- 6) **Power and Hand Tools** (30% of Section 2) – These questions pertain to tools that are not considered to be measurement and troubleshooting tools.
