Trumping the Media Michael Mario Albrecht, 2022-08-11 The ascendancy of Donald J Trump to the office of president was not a fluke Changes in the media environment and changes in the political landscape converged and provided fertile ground for a demagogic populist to exploit existing structures for his personal and political gains A right wing ecosystem had developed that included cable television talk radio social media and imageboards The political rise of Trump occurred alongside a mainstreaming of far right politics and a skepticism towards long established institutions Trump was able to exploit the shifts in politics and the media environment for his political gain He deployed a post truth strategy that challenged established media and political institutions and their claims to be arbiters of truth and protectors of democracy This book explores the shifts in the media environment that made the political career of Donald Trump possible The author shows the ways that Trump was able to inhabit the new media and political landscape and take advantage of journalistic norms and practices that were susceptible to exploitation by a demagogue with no allegiance to the truth and no reverence towards the foundations of liberal democracy Understanding the ways in which Trump was able to emerge as a powerful political force is essential to those invested in challenging the momentum of the alt right and forwarding the project of democracy

Journalism Tim P. Vos, 2018-05-22 This volume sets out the state of the art in the discipline of journalism at a time in which the practice and profession of journalism is in serious flux. While journalism is still anchored to its history, change is infecting the field. The profession and the scholars who study it are reconceptualizing what journalism is in a time when journalists no longer monopolize the means for spreading the news. Here journalism is explored as a social practice, as an institution, and as memory. The roles, epistemologies, and ethics of the field are evolving. With this in mind, the volume revisits classic theories of journalism such as gatekeeping and agenda setting, but also opens up new avenues of theorizing by broadening the scope of inquiry into an expanded journalism ecology which now includes citizen journalism, documentaries, and lifestyle journalism, and by tapping the insights of other disciplines such as geography, economics, and psychology. The volume is a go-to map of the field for students and scholars, highlighting emerging issues, enduring themes, revitalized theories, and fresh conceptualizations of journalism.

News, Neoliberalism, and Miami's Fragmented Urban Space Moses Shumow, Robert E. Gutsche Jr., 2016-11-23 *News, Neoliberalism, and Miami's Fragmented Urban Space* examines cultural and social forces responsible for inequalities that have emerged in the rampant development of Miami as a world city. This book argues that neoliberal movements rely on the power of journalistic discourses to authorize and legitimize harmful social acts such as gentrification. Moses Shumow and Robert E. Gutsche Jr. provide original analyses of intersections among memory, race, capitalism, and journalistic power, particularly at a time of immense political and environmental change. The authors examine changes in neighborhoods and in public-private developments that are bound to widen an already great divide between classes and races in South Florida.

Climate Change, Media & Culture Juliet Pinto, Robert E. sweeping examination of anti intellectualism in American journalism A murky presence anti intellectualism is not acknowledged by reporters and editors It is not easily measured by scholars as it entails opportunities not taken context not provided ideas not examined Where Ideas Go to Die will be the first book to document how journalism polices intellect at a time when thoughtful examination of our society s news media is arguably more important than ever Through analysis of media encounters with dissent since 9 11 McDevitt argues that journalism engages in a form of social control routinely suppressing ideas that might offend audiences McDevitt is not arguing that journalists are consciously or purposely controlling ideas but rather that resentment of intellectuals and suspicion of intellect are latent in journalism and that such sentiment manifests in the stories journalists choose to tell or not to tell In their commodification of knowledge journalists will for example clarify ideas to distill deviance dismiss nuance as untranslatable and funnel productive ideas into static partisan binaries Anti intellectualism is not unique to American media Yet McDevitt argues that it is intertwined with the nation s cultural history and consequently baked into the professional training that occurs in classrooms and newsrooms He offers both a critique of our nation s media system and a way forward to a media landscape in which journalists recognize the prevalence of anti intellectualism and take steps to avoid it and in which journalism is considered an intellectual profession

X. Dentith, 2018-11-16 The contributors to this volume argue that whilst there is a commonplace superstition conspiracy theories are examples of bad beliefs and that the kind of people who believe conspiracy theories are typically irrational many conspiracy theories are rational to believe the members of the Dewey Commission were right to say that the Moscow Trials of the 1930s were a sham Woodward and Bernstein were correct to think that Nixon was complicit in the conspiracy to deny any wrongdoing in the

Watergate Hotel break in and if we either accept the terrorist events of 9 11 were committed by Al Qaeda or that the Bush Administration was responsible then it seems we are endorsing some theory about a conspiracy to commit an act of terror on American soil As such there is no reason to reject conspiracy theories sui generis This volume challenges the prima facie that conspiracy theories are irrational beliefs arguing that we should treat conspiracy theories and the phenomena of conspiracy theories seriously It presents fresh perspectives from the wider philosophical sociological and psychological community on what is becoming an issue of increasing relevance in our time

Holding the Blue Line in Australia Virginia Small,2025-09-26 This book examines the portrayal of contemporary policing in New South Wales Australia by mainstream media and how its sourcing of social media influences public opinion The observable and measurable consequences of this intermingling of news content with viewpoints is that mainstream media in tandem with social media influence political leaders to respond and pivot readily towards platformed views with either quick reactions through policymaking and new or revised legislation or arbitrarily letting matters slide The phenomenon is analysed through specific case studies in the book and the complications for police media and crisis management are identified This extensive research has relevance for policing globally because mainstream media relies heavily on social media content that is instantaneous global curated and reliant on marketable and readily understood narratives The book analyses the selective process by which actors in mainstream media construct news relying on prior framing narratives and perpetuating the received opinion of social media as if it represents general belief Media framing

disrupts and interrupts public understandings of the role of policing and perpetuates misunderstanding in the public arena of the institutional values and legislated responsibilities of a police force In addition strategies employed by social media activists to frame and re contextualise crisis events impact on police law enforcement operations and can hamper police capacity to respond to protect public safety

News Media and Power in Russia Olessia Koltsova, 2006-09-27 The end of communist rule in the Soviet Union brought with it a brave new world of media and commerce Formerly state owned enterprises were transformed often through private ownership and new corporations sprung up overnight to take advantage of the new atmosphere of freedom Until now most research on media and news production in Russia has focused on the scope of government control and comparisons with the communist era However extra governmental controls and the challenges of operating in a newly capitalist environment have been just as important if not more so in the formation of the new media climate Filling the gap in the literature this book examines the various agents who make the news and discusses the fierce struggle among the various agents of power involved Drawing on existing theories and scholarship the book provides a wealth of detail on the actual daily practices of news production in Russia Original research is combined with compelling first hand accounts of news production and dissemination to provide an incisive look at the issues and power structures Russian journalists face on a daily basis

Architecture as Communication Ross A. Eaman, 2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate
