Artificial Intelligence Applications and Innovations John MacIntyre,Ilias Maglogiannis,Lazaros Iliadis,Elias Pimenidis,2019-05-15 This book constitutes the refereed proceedings of two International Workshops held as parallel events of the 15th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2019 in Hersonissos Crete Greece in May 2019 the 8th Mining Humanistic Data Workshop MHDW 2019 and the 4th Workshop on 5G Putting Intelligence to the Network Edge 5G PINE 2019 The 6 full papers and 4 short papers presented at MHDW 2019 were carefully reviewed and selected from 13 submissions out of the 14 papers submitted to 5G PINE 2019 6 were accepted as full papers and 1 as short paper The MHDW papers focus on the application of innovative as well as existing data matching fusion and mining and knowledge discovery and management techniques such as decision rules decision trees association rules ontologies and alignments clustering filtering learning classifier systems neural networks support vector machines preprocessing post processing feature selection visualization techniques to data derived from all areas of humanistic sciences e g linguistic historical behavioral psychological artistic musical educational social and ubiquitous computing and bioinformatics The papers presented at 5G PINE focus on several innovative findings coming directly from modern European research in the area of modern 5G telecommunications infrastructures and related innovative services and cover a wide variety of technical and business aspects promoting options for growth and development

Artificial Intelligence In Accounting Dr. Shubham Saxena ,2024-04-01 The accounting profession is at the cusp of significant change driven by AI and data analytics While some routine tasks may be automated the core values and skills of accountants remain vital The ability to exercise judgment uphold ethical standards and provide strategic financial guidance will continue to define the role of accountants in the age of AI Moreover embracing AI and data analytics opens up exciting opportunities for accountants to leverage technology in their work providing even greater value to organizations Aspiring accountants and finance professionals should take note of these

trends and consider how they can prepare for a future where AI is a valuable tool in their toolkit

Dietary Reference Intakes for Thiamin, Riboflavin, Niacin, Vitamin B6, Folate, Vitamin B12, Pantothenic Acid, Biotin, and Choline
 Institute of Medicine, Food and Nutrition Board, Subcommittee on Upper Reference Levels of Nutrients, Standing Committee on the Scientific Evaluation of Dietary Reference Intakes and its Panel on Folate, Other B Vitamins, and Choline, 2000-06-15

Since 1941 Recommended Dietary Allowances RDAs has been recognized as the most authoritative source of information on nutrient levels for healthy people. Since publication of the 10th edition in 1989 there has been rising awareness of the impact of nutrition on chronic disease. In light of new research findings and a growing public focus on nutrition and health the expert panel responsible for formulation RDAs reviewed and expanded its approach the result Dietary Reference Intakes. This new series of references greatly extends the scope and application of previous nutrient guidelines. For each nutrient the book presents what is known about how the nutrient functions in the human body what the best method is to determine its requirements which factors caffeine or exercise for example may affect how it works and how the nutrient may be related to chronic disease. This volume of the series presents information about thiamin riboflavin niacin vitamin B6 folate vitamin B12 pantothenic acid biotin and choline. Based on analysis of nutrient metabolism in humans and data on intakes in the U S population the committee recommends intakes for each age group from the first days of life through childhood sexual maturity midlife and the later years. Recommendations for pregnancy and lactation also are made and the book identifies when intake of a nutrient may be too much. Representing a new paradigm for the nutrition community Dietary Reference Intakes encompasses Estimated Average Requirements EARs. These are used to set Recommended Dietary Allowances RDAs. Intakes that meet the RDA are likely to meet the nutrient requirement of nearly all individuals in a life stage and gender group. Adequate Intakes AIs. These are used instead of RDAs when an EAR cannot be calculated. Both the RDA and the AI may be used as goals for individual intake. Tolerable Upper Intake Levels ULs. Intakes below the UL are unlikely to pose risks of adverse health effects in healthy people. This new framework encompasses both essential nutrients and other food components thought to play a role in health such as dietary fiber. It incorporates functional endpoints and examines the relationship between dose and response in determining adequacy and the hazards of excess intake for each nutrient.
