After 10 years as a novel writer I ve developed my first confirmed case of severe writer s block Writer s block is basically when your brain shuts down and takes your imagination with it You walk around the house starting ideas and even sitting down at the computer to write the book only to get back up because you ordered something from Amazon and the doorbell just rang You ll do anything to find a way to walk away from the computer Little snippets of thought stay just out of reach in your mind not allowing you to develop a decent story out of the little snippet Because that s what a story begins with A little thought that keeps rolling and rolling until you have a paragraph and you just can t fucking believe it Then you ve got a couple of pages then chapters then holy shit you wrote a book Every writer develops writer s block at some time Usually it lasts for a couple of weeks or maybe even a month This was my 6th month Six months locked in pure uninspired hell It s hard to compare this feeling with anything other than getting laid off from work Or maybe you and your brain getting a divorce It just seems like the important connections in the brain have become detached My publishing company is waiting for my writer s block to dissipate I have given them 10 years of very successful books including 7 New York Times top ten bestsellers and many others that achieved great success My field has made me a rich man and I really should have no complaints Even if the block never lifted I was still set for life Unfortunately I am 36 years old Way too young to be dealing with a block bad enough to derail a career
