

Mechanisms of Evolution

Study Guide

What is evolution?

Answer: Evolution is the process of change in the inherited characteristics of biological populations over successive generations.

What is natural selection?

Answer: Natural selection is the process by which organisms better adapted to their environment tend to survive and reproduce more successfully than others.

What is genetic drift?

Answer: Genetic drift is the random fluctuation of allele frequencies in a population due to chance events.

What is gene flow?

Answer: Gene flow is the transfer of genetic variation from one population to another.
