Media Events In Web 2.0 China Interventions Of Online Activism:

Media Events in Web 2.0 China Dr Jian Xu PhD, 2015-12-15 This book is among the first to use a media events framework to examine China's Internet activism and politics and the first study of the transformation of China's media events through the parameter of online activism. The author locates the practices of major modes of online activism in China: shanzhai culture, jamming, citizen journalism, and weiguan-mediated mobilisation into different types of Chinese media events: ritual celebration, natural disaster, political scandal. The contextualised analysis of online activism thus enables exploration of the spatial, temporal, and relational dimensions of Chinese online activism with other social agents such as the Party state, mainstream media, and civil society. Analysis reveals Internet politics in China on three interrelated levels: the individual, the discursive, and the institutional. Contemporary cases rich in empirical research data and interdisciplinary theory demonstrate that the alternative and activist use of the Internet has intervened into and transformed conventional Chinese media events in various types of agents, their agendas, and performances, and the subsequent and corresponding political impact. The Party market-controlled Chinese media events have become more open, contentious, and deliberative in the Web 2.0 era due to the active participation of ordinary Chinese people aided by the Internet.

Media Activism in the Digital Age Victor Pickard, Guobin Yang, 2017-07-06 Media Activism is the first collection of its kind to explore the political economy of social movements, the aesthetic styles, and cultural forms of mediated political expressions, and the patterns of longer-term historical change in the forms and tactics of activism. From memes to zines, hacktivism to artivism, this book considers activist practices involving both older kinds of media alongside newer digital, social, and network-based forms. The book provides fascinating case studies of activists using media to make political interventions in different historical periods and at local, national, and global levels.

Digital Citizenship in China Jun Fu, 2021-09-20 This book examines how emerging forms of citizenship are shaped by young people in digital spaces as a way of making sense of contemporary Chinese society, forming new identities, and negotiating social and political participation. By focusing on Chinese young adults' everyday online practices, the book offers a unique treatment of the topic of young people and the Chinese Internet that navigates between the dominant focus on censorship on the one hand and protest and politicized action on the other. The book brings the focus of research from highly visible or spectacular forms of collectivity, belonging, and identification exhibited in young people's online practices to young people's everyday social and cultural engagement through new media. It brings new insights by understanding the meanings of young people's mundane and everyday online engagement for their citizenship learning, identity performance, and their formation of political subjectivity. Readers will gain insights into citizenship in China and young people and the Chinese Internet.

China in the Era of Social Media Junhao Hong, 2020-06-22 China in the Era of Social Media discusses how social media is changing the world in an unprecedented way through speed, scope, and depth. In the last decade or so, social media in China has witnessed the most explosive growth in the world. Being the most populous nation in the world, it has the

most social media users in the world as well. This book examines the current situation and unique characteristics of Chinese social media, the significance of social media in the country's social transformation and particularly its influences on political change in the nation. The main goal of this book is to explore how social media has been affecting and thus changing China's political system, the ruling communist ideology and the state-run media as well as its public discourse and public opinions. Scholars of Asian studies, political science and communications will find this book particularly interesting.

Media Politics in China Maria Repnikova, 2017-06-15 Maria Repnikova offers an innovative analysis of the media oversight role in China by examining how a volatile partnership is sustained between critical journalists and the state.

Handbook of Research on Citizen Engagement and Public Participation in the Era of New Media Adria, Marco, Mao, Yuping, 2016-11-22 New media forums have created a unique opportunity for citizens to participate in a variety of social and political contexts. As new social technologies are being utilized in a variety of ways, the public is able to interact more effectively in activities within their communities. The Handbook of Research on Citizen Engagement and Public Participation in the Era of New Media addresses opportunities and challenges in the theory and practice of public involvement in social media. Highlighting various communication modes and best practices being utilized in citizen involvement activities, this book is a critical reference source for professionals, consultants, university teachers, practitioners, community organizers, government administrators, citizens and activists.

Politics in China William A. Joseph, 2024-07-19 Politics in China is an authoritative introduction to how the world's second most populous nation and rapidly rising global power is governed today. Written by leading China scholars, each chapter offers an accessible overview of a key topic in Chinese politics. The fourth edition of Politics in China has been thoroughly updated and includes a new chapter on the rise and rule of Xi Jinping. It is essential reading not only for students studying the PRC but also for any reader interested in learning how China has evolved in recent times, how its political system works and about the most important challenges it faces in years ahead.

The Evolution of the Chinese Internet Shaohua Guo, 2020-12-15 Despite widespread consensus that China's digital revolution was sure to bring about massive democratic reforms, such changes have not come to pass. While scholars and policy makers alternate between predicting change and disparaging a stubbornly authoritarian regime, in this book Shaohua Guo demonstrates how this dichotomy misses the far more complex reality. The Evolution of the Chinese Internet traces the emergence and maturation of one of the most creative digital cultures in the world through four major technological platforms: the bulletin board system, the blog, the microblog and WeChat. Guo transcends typical binaries of freedom and control to argue that Chinese Internet culture displays a uniquely sophisticated interplay between multiple extremes and that its vibrancy is dependent on these complex negotiations. In contrast to the flourishing of research findings on what is made invisible online, this book examines the driving mechanisms that grant visibility to particular kinds of user-generated content. Offering a systematic account of how and why an ingenious Internet culture has been able to thrive, Guo highlights the pivotal roles that media institutions

technological platforms and creative practices of Chinese netizens have played in shaping culture on and offline **Media Events in Web 2.0 China** Jian Xu (Teacher of Chinese), 2016 This book is among the first to use a media events framework to examine China's Internet activism and politics and the first study of the transformation of China's media events through the parameter of online activism The author locates the practices of major modes of online activism in China shanzhai e gao citizen journalism and weiguan into different types of Chinese media events ritual celebration natural disaster and political scandal The contextualized analysis of online activism thus enables exploration of the spatial temporal and relational dimensions of Chinese online activism with other social agents such as the Party state mainstream media and civil society Analysis reveals China's Internet politics on three interrelated levels the individual the discursive and the institutional The book demonstrates that the alternative and activist uses of the Internet have provided opportunities and possibilities for challenging and transforming different types of media events via agents agendas performance and political impacts The Party market controlled Chinese media events have become more open contentious and deliberative in the Web 2.0 era due to the active participation of ordinary Chinese people aided by the Internet and new media Research Anthology on Citizen Engagement and Activism for Social Change Management Association, Information Resources, 2021-11-26 Activism and the role everyday people play in making a change in society are increasingly popular topics in the world right now especially as younger generations begin to speak out From traditional protests to activities on college campuses to the use of social media more individuals are finding accessible platforms with which to share their views and become more actively involved in politics and social welfare With the emergence of new technologies and a spotlight on important social issues people are able to become more involved in society than ever before as they fight for what they believe It is essential to consider the recent trends technologies and movements in order to understand where society is headed in the future The Research Anthology on Citizen Engagement and Activism for Social Change examines a plethora of innovative research surrounding social change and the various ways citizens are involved in shaping society Covering topics such as accountability social media voter turnout and leadership it is an ideal work for activists sociologists social workers politicians public administrators sociologists journalists policymakers social media analysts government administrators academicians researchers practitioners and students The Other Digital China Jing Wang, 2019-12-10 A scholar and activist tells the story of change makers operating within the Chinese Communist system whose ideas of social action necessarily differ from those dominant in Western liberal societies The Chinese government has increased digital censorship under Xi Jinping Why Because online activism works it is perceived as a threat in halls of power In The Other Digital China Jing Wang a scholar at MIT and an activist in China shatters the view that citizens of nonliberal societies are either brainwashed or complicit either imprisoned for speaking out or paralyzed by fear Instead Wang shows the impact of a less confrontational kind of activism Whereas Westerners tend to equate action with open criticism and street revolutions Chinese activists are building an invisible and

quiet coalition to bring incremental progress to their society Many Chinese change makers practice nonconfrontational activism They prefer to walk around obstacles rather than break through them tactfully navigating between what is lawful and what is illegitimate The Other Digital China describes this massive gray zone where NGOs digital entrepreneurs university students IT companies like Tencent and Sina and tech communities operate They study the policy winds in Beijing devising ways to press their case without antagonizing a regime where taboo terms fluctuate at different moments What emerges is an ever expanding networked activism on a grand scale Under extreme ideological constraints the majority of Chinese activists opt for neither revolution nor inertia They share a mentality common in China rules are meant to be bent if not resisted

Disability and Social Media Katie Ellis, Mike Kent, 2016-11-10 Social media is popularly seen as an important media for people with disability in terms of communication exchange and activism These sites potentially increase both employment and leisure opportunities for one of the most traditionally isolated groups in society However the offline inaccessible environment has to a certain degree been replicated online and particularly in social networking sites Social media is becoming an increasingly important part of our lives yet the impact on people with disabilities has gone largely unscrutinised Similarly while social media and disability are often both observed through a focus on the Western developed and English speaking world different global perspectives are often overlooked This collection explores the opportunities and challenges social media represents for the social inclusion of people with disabilities from a variety of different global perspectives that include Africa Arabia and Asia along with European American and Australasian perspectives and experiences

Handbook of Children and Youth Studies Johanna Wyn, Helen Cahill, Hernán Cuervo, 2024-08-20 This second edition of the handbook gives a new scientific perspective to youth and childhood studies as multi scientific and interdisciplinary subjects which as such have not yet found their own framing in a particular discipline It provides theoretical and methodological key debates and issues that develop and add an understanding of childhood and youth research discipline from a broader perspective The Handbook on Children and Youth Studies draws on current thinking but also challenges theoretical and conceptual orthodoxies in the field drawing on interdisciplinary thinking and critical perspectives It focuses on childhood and youth to address the emerging consensus that the boundaries between childhood youth and adulthood are blurred The view that defining youth and childhood largely in terms of problem topics is out dated Instead the handbook focuses on 16 themes that are open to international perspectives and to different conceptual approaches Each theme is edited by a pair of field editors thereby capturing a plurality of views The 16 themes as a starting point are globally timely and they need scientific debates on the boundaries between childhoods youth and adulthood This handbook will meet the needs of childhood and youth researchers and the academics in the field It recognizes the changing social context of the lives of children and young people while developing theoretical frameworks and discussing about the core substantive issues of Children and Youth Studies

Using New Media for Citizen

Engagement and Participation Adria, Marco, 2019-12-27 Recent technological advancements have made it possible to use moderated discussion threads on social media to provide citizens with a means of discussion concerning issues that involve them. With the renewed interest in devising new methods for public involvement, the use of such communication tools has caused some concern on how to properly apply them for strategic purposes. *Using New Media for Citizen Engagement and Participation* provides emerging research exploring the theoretical and practical aspects of how social media should be added to public involvement activities such as citizen juries, public deliberation, and citizen panels. Readers will be offered insights into the critical design considerations for planning, carrying out, and assessing public involvement initiatives. Featuring coverage on a broad range of topics such as citizen journalism, online activism, and public discourse, this book is ideally designed for corporate professionals, broadcasters, news writers, column editors, politicians, policy managers, government administrators, academicians, researchers, practitioners, and students in the fields of political science, communications, sociology, mass media, and broadcasting, public administration, and community service learning.

Cultural China 2020 Séaghd Kehoe, Gerda Wielander, 2021-11-29 *Cultural China* is a unique annual publication for up-to-date informed and accessible commentary about Chinese and Sinophone languages, cultural practices, politics, and production, and their critical analysis. It builds on the University of Westminster's Contemporary China Centre Blog, providing additional reflective introductory pieces to contextualise each of the eight chapters. The articles in this Review speak to the turbulent year that was 2020 as it unfolded across cultural China. Thematically, they range from celebrity culture, fashion, and beauty to religion and spirituality, via language, politics, heritage, and music. Pieces on representations of China in Britain and the Westminster Chinese Visual Arts Project reflect our particular location and home. Many of the articles in this book focus on the People's Republic of China, but they also draw attention to the multiple Chinese and Sinophone cultural practices that exist within, across, and beyond national borders. The Review is distinctive in its cultural studies-based approach and contributes a much-needed critical perspective from the Humanities to the study of cultural China. It aims to promote interdisciplinary dialogue and debate about the social, cultural, political, and historical dynamics that inform life in cultural China today, offering academics, activists, practitioners, and politicians a key reference with which to situate current events in and relating to cultural China in a wider context.

Digital Leisure Cultures Sandro Carnicelli, David McGillivray, Gayle McPherson, 2016-08-12 The digital turn in leisure has opened up a vast array of new opportunities to play, learn, participate, and be entertained, opportunities that have transformed what we recognise as leisure. This edited collection provides a significant contribution to our changing understanding of digital leisure cultures, reflecting on the socio-historical context within which the digital age emerged, while engaging with new debates about the evolving and controversial role of digital platforms in contemporary leisure cultures. This book also demonstrates the interdisciplinary nature of studying digital leisure cultures. To make sense of how individuals and institutions use digital spaces, it is necessary to draw on history.
