Inside the Cell Erin E. Murphy, 2015-10-06 a version less likely to play out on dramatic television shows In Inside the Cell Erin Murphy shows how DNA typing can be subject to misuse mistake and error and lead to a police state run amok Murphy shows the perils of a society in which stop and frisk becomes stop and spit or in which police pose undercover to get a DNA sample from your discarded lunch Already police can collect DNA when making an arrest sometimes before charging a person with a crime The government is building a massive DNA database stockpiling samples from as much as a third of the male population and the laws regulating what they can and cannot do with them are weak Murphy shows how this invites the riskiest kind of genetic surveillance imaginable Just because DNA testing is good science does not mean that it is foolproof Faulty forensic science is

the number two factor leading to wrongful conviction and yet we have done little to improve the use of science in criminal justice
