Proficiency testing in Histocompatibility and Immunogenetics: current status and future perspectives Kelley M. K. Hitchman, Martin Petrek, Milena Vraná, Jose Palacio-Gruber, 2025-06-12 Proficiency testing (PT) has been part of Immunogenetics since its early days. Starting from spontaneous interlaboratory comparisons, it gradually moved to more elaborate quality control exercises. Immunogenetics PT finally evolved into a formalized system comprising a range of testing schemes, the rules of which have been fine-tuned and approved with the assistance of professional societies. Current external PT/EPT schemes offer to survey laboratory performance in all spectra of Histocompatibility and Immunogenetics. However, a personal reflection of experience from participation in or organizing a PT scheme would be also interesting to readers and welcomed by The Editors.

Novel Technologies in the Diagnosis and Management of Sleep-disordered Breathing Henri Korkalainen, Ding Zou, 2024-03-13 Sleep-disordered breathing, ranging from habitual snoring to severe obstructive sleep apnea, is highly prevalent and represents a growing global healthcare burden. Besides disrupting sleep, sleep-disordered breathing leads to detrimental outcomes such as excessive daytime sleepiness, neurocognitive impairment, and increased cardiometabolic morbidities. The gold standard diagnostic procedures, e.g., in-lab polysomnography, are cumbersome, and standard parameters derived from sleep studies often yield poor long-term prognostic value. Hence, there is a need for innovative diagnostic technologies and novel sleep metrics to enable simple diagnosis and tailored disease management.
