**Instructions:** Read the following passage about Nvidia. Then answer the following questions.

July 9, 2025 – Nvidia, a company that makes computer chips, briefly became the first company ever to reach a market capitalization valued at \$4 trillion. This means all of its shares added together were worth \$4 trillion in the stock market. These GPUs were originally designed for video gaming and to make computer graphics look good, but with the boom in artificial intelligence technologies, they have found another use. This is because GPUs can process a lot more information at once than other computer components, helping computers do tasks like understanding speech or recognizing images.

By the end of the day, Nvidia's shares had gained 1.8%, making its total market value \$3.97 trillion. Last year, it reached \$1 trillion in value and then tripled in about a year, growing faster than other big companies such as Apple and Microsoft. Investors believe Nvidia will keep growing because more companies
